FOREWORD

Indian Agriculture Census Programme, which started in 1970-71, is an important data collection activity undertaken by the Department every 5 years in collaboration with States/UTs. Collection and maintenance of data on operational holdings are necessary for formulation of effective and meaningful policies and agricultural developmental programmes at the National, State and Local level.

This report presents an analysis of data collected in Phase-II of Agriculture Census 2015-16. The gigantic task of organizing Agriculture Census covering about 146 million operational holdings could be achieved only through the active involvement and support of the States & UTs and with technical back stopping, administrative support and continuous monitoring by the Agriculture Census Division. I wish to record my appreciation for the outstanding work done by the Agriculture Census Division under the guidance of the Additional Director General, Shri R.K. Kamra. I also wish to mention the dedicated efforts made by all the Officers/Officials of the States/UTs involved in collection, tabulation and other constituent activities for accomplishing this mammoth exercise.

I hope this report would be found useful by all the data users and organizations associated with the development of agriculture in the country.

PREFACE

The Department of Agriculture, Cooperation and Farmers Welfare has been conducting Agriculture Census quinquennially in India since 1970-71 as part of World Agriculture Census Programme in collaboration with the States and Union Territories. So far, nine Agriculture Censuses have been conducted and the present Agriculture Census 2015-16 is the Tenth in the series. The basic unit in Agriculture Census is 'Operational Holding' rather than 'Ownership Holding' as the farm level decisions are taken by persons who operate the land and not by those who own it.

The present report pertains to the data collected through Phase-II of Agriculture Census 2015-16 and provides key results on irrigation status, tenancy particulars, cropping pattern etc. at national level and for various States/UTs. The summary results are further classified by various classes of holding and social groups.

This gigantic task of the Census could not have been accomplished without cooperation of the officers of States/UTs who made considerable effort to ensure accuracy of field data and its timely completion. I also acknowledge with thanks the assistance provided by National Institute of Electronics & Information Technology(NIELIT) in data processing and tabulation of Agriculture Census 2015-16.

I would like to place on record my appreciation for the outstanding work rendered by Officers and Staff of the Agriculture Census Division of the Department of Agriculture, Cooperation & Farmers Welfare (DAC&FW), under the guidance of Dr. Dalip Singh, Deputy Director General & Agriculture Census Commissioner, Government of India, in bringing out the Report.

I hope the Report would be useful for policy makers, researchers and students involved in the field of agriculture for its development.

(R. K. Kamra)

Introduction

Given the diversity of Indian agriculture, there is a huge demand for agricultural data from governments (Central, States/UTs and local) policy makers and planners, business entities engaged in trading agricultural goods and services and the farming community. A significant part of this demand is met through a five-yearly agricultural census and a linked follow-up survey of agricultural holdings in the country covering the structural statistics, like number and area of holdings, cropping pattern, irrigation status, machinery and credit use, which are slow changing and are the basis for many social protection and welfare policies.

2. The Department of Agriculture, Cooperation and Farmers Welfare, Ministry of Agriculture & Farmers Welfare, Government of India conducts Agriculture Censuses in India in collaboration with States/UTs following standard concepts, definitions and methodology. Since the launch of first Agriculture Census in 1970-71, the country has conducted nine Agriculture Censuses so far and the present census with reference year 2015-16 is 10th in the series. Entire Census operation is conducted in three phases and operational holding is taken as statistical unit at micro level for data collection. Based on the agriculture census data collected in three phases, the Department brings out three detailed reports analysing trends on various parameters at All India and States/UTs level. District/Tehsil level reports are prepared by the respective States/UTs.

3. The final results of Phase-II of Agriculture Census 2015-16 are being published in this report. The effort has been made to present a perspective on historical background, organization of Agriculture Census besides concepts, definitions, sampling design, estimation procedure, limitation of data with purposive analysis of data at All India and State levels. The Phase-II data of Agriculture Census is collected from 20 percent villages on sample basis.

4. As per final results, the Gross Cropped Area (GCA) was estimated at 191.76 million hectare against 193.76 million hectare in 2010-11, recording a decrease of 1.03 %. The net irrigated area during Agriculture Census 2015-16 was 68.23 million hectare, out of which 49.13% was accounted by small and marginal holdings, 43.16% by Semi-medium & Medium holdings and 7.71% by large holdings.

5. The gross irrigated area in 2015-16 was estimated at 95.58 million hectare, which was 49.84 % of the gross cropped area while 48.73% of the net area sown was irrigated. The percentage of net irrigated area to net sown area were estimated at 53.60, 46.47, 47.12, 49.13 and 44.43 for marginal, small, semi-medium, medium and large holdings respectively.

6. The cropping intensity as per Agriculture Census 2015-16 worked out to 1.37 ha. About 92.0 % of operational holdings were wholly owned and self-operated during Agriculture Census 1970-71 which rose to about 97.61 % in 2010-11 and had been estimated at 97.73 % in 2015-16.

7. An attempt has been made to present the data in objective and compressed form. It is hoped that the policy makers, researchers and other concerned with agricultural development would find this report useful. The data at various administrative levels like Tehsil/District/State and all India is also available on the Department's website <http://agcensus.nic.in> for public use.

8. I express my sincere thanks to the officers and staff of Agriculture Census Division, Department of Agriculture, Cooperation & Farmers Welfare, Government of India and States/UTs for their commendable job in finalizing the Census data in shortest possible period. I also acknowledge with thanks the assistance provided by National Institute of Electronics & Information Technology (NIELIT) in data processing and tabulation of Agriculture Census 2015-16.

HIGHLIGHTS

- The total number of operational holdings in the country has increased from 138.35 million in 2010-11 to 146.45 million in 2015-16 showing an increase of 5.86%. The highest percentage share in 2015-16 was observed in marginal category (68.5%) followed by small (17.6%), semi-medium (9.6%), medium (3.8%) and large category (0.6%).
- The total operated area in the country has decreased from 159.59 million ha. in 2010-11 to 157.82 million ha. in 2015-16 showing a decrease of 1.11%. The highest percentage share in 2015-16 was observed in marginal category (24%) followed by semi-medium (23.8%), small (22.9%), medium (20.2%) and large category (9.1%).
- The average size of operational holdings has declined to 1.08 ha. in 2015-16 as compared to 1.15 in 2010-11.
- The percentage share of female operational holders has increased from 12.79% in 2010-11 to 13.96% in 2015-16 with the corresponding figures of 10.36% and 11.72% in operated area. In 2015-16, participation of female operational holders was highest under marginal category (72%) followed by small (17%) and semi-medium (8.1%). The share of female operational holders belonging to SC and ST social group were estimated at 11.4% and 7.9 % respectively.
- The percentage share of Wholly owned & self operated holdings in total operational holdings has remained static at about 98% in 2010-11 and 2015-16.
- The number of wholly leased-in holdings was estimated at 5.31 lakh (0.36%) in 2015-16 and was highest in marginal category (4.54 lakh). Among states, the highest share of wholly leased-in holdings in total operational holdings was observed in the state of Odisha (5.82%) followed by Goa (5.53%), Manipur (4.40%), West Bengal (1.62%), Sikkim (1.45 %), Punjab (0.60%) and Andhra Pradesh (0.36%).
- The Gross cropped area has decreased marginally from 193.76 million hectare in 2010-11 to 191.76 million hectare in 2015-16. In 2015-16, the highest percentage share was observed in marginal category (25.6%) and lowest in large category (8.4%). Among major states, Uttar Pradesh had the highest share (14.0%) in gross cropped area followed by Rajasthan (12.8%), Madhya Pradesh (12.1%) and Maharashtra (11.9%).
- The percentage share of net sown area in operated area has increased marginally from 88.5% in 2010-11 to 88.7% in 2015-16. In 2015-16, the highest proportion of net sown area in operated area was observed in marginal category (90.4%) and lowest in large category (82.8%). Among major states, Gujarat had the highest share of 98.3 % followed by Madhya Pradesh (95.5%), Karnataka (95.1%), Uttar Pradesh (94.4%), West Bengal (94.3%), Maharashtra (87.6%) and Rajasthan (85.7%).

- The percentage share of net irrigated area to net sown area has increased from 45.7% in 2010-11 to 48.7% in 2015-16; and highest increased was observed in large category (18.3%) and lowest in marginal category (2.6%). In 2015-16, the proportion of net irrigated area to net sown area was highest in marginal category (53.6%) and lowest in large category (44.4%). Among major states, Uttar Pradesh had the highest share of 83.2% followed by West Bengal (68.2%), Tamil Nadu (62.2%), Bihar (61.4%), Madhya Pradesh (56.3%), Andhra Pradesh (48.9%), Gujarat (54.2%) and Rajasthan (43.4%).
- The percentage of gross irrigated area to gross cropped area has increased from 45.3% in 2010-11 to 49.8 % in 2015-16. In 2015-16, the highest proportion of gross irrigated area to gross cropped area was observed in marginal category (54.0%) and lowest in small category (46.6%). Among major states, Uttar Pradesh had the highest share of 79.5% followed by Bihar (68.2%), Tamil Nadu (62.3%), West Bengal (59.4%) and Gujarat (51.9%).
- The cropping intensity has remained static at 1.37 during 2015-16 and 2010-11. Among states, Punjab recorded the highest cropping intensity of 1.97 while Mizoram recorded the lowest cropping intensity of 1.00.
- The percentage share of all food crops in gross cropped area has gone down marginally from 76.3% in 2010-11 to 75.1% in 2015-16 while the percentage share of all non-food crops has increased marginally from 23.7% to 24.9% during the same period.

**LIST OF OFFICERS ASSOCIATED WITH THE PREPARATION OF
ALL INDIA REPORT**

Dr. Dalip Singh
Deputy Director General & Agriculture Census
Commissioner

Name	Designation
Shri R. N. Soreithem	<i>Deputy Director</i>
Shri Gurvinder Singh	<i>Data Processing Manager</i>
Shri Tusar Bordoloi	<i>Sr. Statistical Officer</i>
Shri Arun Kumar	<i>Jr. Statistical Officer</i>
Shri Pankaj Dutt	<i>Data Entry Operator Gr. 'B'</i>
Shri Jagdish Tanwar	<i>Data Entry Operator Gr. 'B'</i>

PART – 1

CHAPTER 1

Historical Background and Organisation of Agriculture Census

Growth of Land Records System

1.1.1 From the earliest times, India's self-sufficient villages constituted the hub of rural economy based on agriculture. Land Revenue was one of the main sources of State Income. Collection of land revenue necessitated maintenance of some records relating to cultivation. In the 16th century, Sher Shah Suri initiated land settlement operations for assessment and collection of land revenue. This was later systematized during the reign of Akbar, when Todar Mal reorganized the entire land revenue system.

1.1.2 The British Empire inherited a well laid out land records system from Mughals. They made drastic changes with a view to further improve land revenue system and augment the State revenue, as this constituted the main source of State income. These changes resulted in the development of two major types of land revenue systems. In Bengal and the adjacent areas, permanent settlement was introduced where private landlords were created to whom Government granted some but not all rights of private property in land. The new landlords acted as intermediaries between the Government and the actual cultivators. This land revenue system came to be known as Zamindari system. In large parts of Bombay and Madras, an entirely different land revenue system was developed wherein only temporary settlements were made. In this system, the Government directly dealt with the cultivators or ryots. This system came to be known as Ryotwari system. Many changes were made in these systems during the course of nineteenth century.

1.1.3 After the attainment of Independence, land laws were aimed at bringing the peasant and State into direct contact. In areas where the Zamindari system prevailed, new laws provided for abolition of intermediaries. In areas where Ryotwari system prevailed, the laws aimed at providing protection to the tenants, actual tillers of the land. These tenant laws had two main objectives. The first was to protect tenants against eviction by granting to them permanent occupancy rights on the Agriculture land they had been tilling. The second was to reduce rents by fixing upper limits.

Land Records and Agricultural Statistics

1.1.4 The gradual evolution of the land record system in the country necessitated maintenance of village forms and registers giving details of land held, various conditions under which these were held. A regular system of revenue administration was established for the purpose. The main objective of these forms and registers has been to furnish basic material for periodic revision of land revenue assessment, settlement of newly occupied lands, suspension and remission of land revenue in the event of calamities affecting crop production, preparation of annual statement of demand of land revenue from holders and other aspects of land revenue administration. These forms and registers of various States agree to a large extent in essential details. Yet, with variations in the systems of land revenue assessment and administration, they show variations from State to State in the form and manner of their preparation and inclusion or exclusion of certain more detailed information. These forms and registers, in vogue for the maintenance of land records in different States, constitute the basis for the land utilisation, crops and irrigation statistics. These land record forms and registers are prepared on complete enumeration basis in all the States except for Kerala, Odisha, West Bengal, Nagaland, Meghalaya, Manipur, Tripura and some of the Union Territories. Detailed procedures for preparing and maintaining them are available in Land Record Manuals of respective States.

1.1.5 Changes in the content and coverage of forms have been made from time to time, to meet increasing requirements of data for planning and implementation of Agriculture development programmes. Agricultural Statistics in India have thus grown with the evolution of land records system in the country.

Improvement in Agricultural Statistics

1.1.6 With the ushering in of the planning era since 1951-52, number of schemes have been undertaken to improve the reporting of Agricultural statistics for use of policies and programmes relating to procurement of foodgrains, imports, exports and pricing of Agricultural commodities etc. Efforts have been made to introduce a complete field to field enumeration system in the three permanently settled states of Kerala, Odisha and West Bengal as per the recommendation made by the National Commission on Agriculture. The National Commission on Agriculture after examining various alternatives for collection of Agricultural statistics, had come to the conclusion that the collection of data based on land records is the best option, provided the basic records are maintained properly. Since the basic land records are maintained by the Patwari, he is the best person to do the crop inspection. He is the most knowledgeable

man in the field and, as such, the most suitable person for collecting the reliable information. The basic structure for collection of Agricultural statistics can be improved by enabling the Patwaris to do their job better and also to ensure that Patwaris and Revenue Inspectors at higher level devote adequate attention to the collection of Agricultural statistics and assign top priority to the work especially during the period of crop inspection. For this purpose, the jurisdiction of Patwari should be reduced to manageable proportion in the States where it is widely spread. Secondly, intensive supervision both by normal revenue agencies and statistical staff should be organized to ensure quality of data at the primary level. The primary and supervisory agencies, therefore, need to be suitably strengthened.

Need for data by operational holdings

1.1.7 In context of the strategy for Agricultural development, knowledge of detailed structure and characteristics of Agricultural holding is imperative for effective and efficient planning and implementation of programmes. For this purpose, it is essential to have information by operational holdings as distinct from ownership holdings which are no doubt useful to have an idea of the distribution of wealth but information by operational holdings is more important for implementation of Agricultural development programmes as such. An operational holding is defined as “all land which is used wholly or partly for Agricultural production and is operated as one Technical Unit by one person alone or with others without regard to title, legal form, size or location”. It is the operational holding which is the fundamental unit of decision making in agriculture and consequently for development programmes aimed at improving the condition of individual cultivators and also the production. Thus, a Census of operational holdings or what is otherwise known as the Agriculture Census for providing basic data on number, size, tenancy, land utilization, cropping pattern and irrigation particulars, etc., assumes importance.

1.1.8 While the system of Agricultural statistics that was in vogue in the country provided for aggregates at various geographical levels, data on structure of holdings had not been tabulated. As early as 1830, the Famine Inquiry Committee stressed the need for adequate statistics of land holdings. Again the Famine Inquiry Commission of 1945 tried to gauge the relationships between the land tenure systems and the efficiency of Agricultural production but the Commission was handicapped in this regard due to non-availability of data in respect of ownership and cultivator’s holdings and the Commission made a number of recommendations

for improvement of Agricultural Statistics. Due to various reasons, these recommendations were not given effect to.

International effort for Agriculture Census

1.1.9 The decennial World Census of Agriculture sponsored by Food and Agriculture Organisation (FAO) of the United Nations essentially constitutes a series of National Agriculture Census taken all over the world in or around the same year within the framework of uniform concepts and definitions and a common programme of items coverage and tabulation. The first step towards the World Census of Agriculture was initiated in 1924 by the International Institute of Agriculture, Rome which persuaded member-countries to carry out a general programme of Agriculture Census on a comparable and uniform pattern. The objective was to obtain from these various countries internationally comparable information on the structure of agriculture through holding-wise enumeration of crop areas and livestock in one operation. Sixty-three countries and territories participated in the first Census in 1930 and of these only 46 countries took it by holdings and the rest obtained aggregates on various levels of geographical areas. The next census was planned for 1940 but could not be carried out due to Second World War. Hence the second World Agriculture Census was carried out around the year 1950 under the guidance of FAO which had since replaced the former International Institute of Agriculture. One hundred and six countries and territories participated in the second census.

1.1.10 The Government of India wanted to take the opportunity of the 1950 round of the World Census of Agriculture to overhaul the country's machinery for collection of Agricultural Statistics. A Technical Committee on Coordination of Agricultural Statistics was set up by the Ministry of Agriculture for the purpose. The Committee worked out detailed forms for collecting comprehensive data relating to the Agricultural economy of the country. The Committee's recommendations for carrying out a census with 1950-51 as the reference year could not, however, be implemented due to constraints on resources. The Third World Agriculture Census was carried out in 1960. Here also India could not go in for a comprehensive Agriculture Census in the country.

Initial efforts in India for data on operational holdings by NSSO

1.1.11 As the Government of India were, however, keen to obtain information on operational holdings, hence both for 1950 and 1960 rounds of Agriculture Census, data required by the World Agriculture Census were collected through sample surveys carried out by National

Sample Survey Organization (NSSO). In connection with the 1950 round of World Agriculture Census, data were collected in India for the major crop season of the Agriculture year 1953-54 during the 8th round of NSS (1954-55). For the 1960 round of World Agriculture Census, data were collected during the 16th round (1960-61) and 17th round (1961-62) of NSS. These gave estimates for the country as a whole and for States. These estimates were of limited value for micro level planning, say, for district or lower regional levels. NSSO also carried out a sample survey of land holdings in its 26th and 37th rounds.

First Comprehensive Agriculture Census in India

1.1.12 When the proposal for 1970 World Census of Agriculture was received from the FAO, the Government of India decided to participate in the Census and conveyed their decision to the FAO. According to the proposal of FAO, the 1970 World Census of Agriculture envisaged in principle the collection of data for all individual holdings by direct enumeration. FAO, however, suggested that sampling may be resorted to for areas where complete enumeration may not be possible. As mentioned earlier, in most parts of India the system of land records containing plot-to-plot details in every village exist. Only in a few States and territories of India such a system was not in vogue. Hence the Government of India decided to obtain the necessary information for the Census by a system of retabulation of the data available in the land records for those states and territories where such comprehensive records exist. In other areas where land records did not exist or gave insufficient census information, sample surveys were thought of and the size of the sample was such as to provide reliable estimates at the district level and for major characteristics even at levels lower than district such as Tehsil/block.

1.1.13 Thus, the first comprehensive Agriculture Census in India was carried out with the Agriculture year 1970-71 as the reference period.

Second Agriculture Census- Reference period and coverage

1.1.14 The experience gained in conducting the Agriculture Census 1970-71 had been rewarding. The use of the data from that census was encouraging and hence it was agreed that similar Agriculture Census should be undertaken at more frequent intervals of time, say, quinquennially. The National Commission on Agriculture also emphasized the need for repeating the Agriculture Census every five years coinciding with the plan periods. The question of carrying out the next Agriculture Census was, therefore, examined in consultation with the States and concerned Central Ministries. It was originally decided in August, 1974

that the next census should be carried out on sample survey basis with the Agriculture year 1975-76 as the reference period. However, a number of changes were likely to take place in the existing land records during 1975-76 and since land records constituted the base for the Agriculture Census in most parts of the country, it was decided to postpone the reference year from 1975-76 to 1976-77. In the 1976-77 Agriculture Census, Sikkim and Mizoram were also covered for the first time to make the coverage complete. But the 1976-77 Census could not be carried out in Punjab for some reasons but estimates were generated on the basis of trend observed in neighboring State of Haryana.

Pilot studies and the procedure

1.1.15 It was envisaged that the 1976-77 Agriculture Census would in general cover a sample of about 20 per cent of the villages and the data on principal characteristics would be obtained from the resident cultivators in the selected villages. The experimental pilot studies carried out to find out the problems under this approach indicated large scale under-estimation, both in area and the number of operational holdings. The under-estimation was mainly due to omissions of resident cultivators and the land operated by them. This was then considered by the Technical Committee on Agriculture Census who recommended that the primary data on number and area of operational holdings (Table 1) should be prepared in respect of all the villages in the States where comprehensive land records exist. For the rest of the items, namely, tenancy, land use, irrigation, crops etc. necessary data might be collected from a sample of 20 per cent of the villages and the entire resident cultivators therein. The advantage of this procedure was that all the survey number operated within the village was completely covered and as such the entire cropped area of the village were accounted for. In the case of non-land record States; however, the entire census was carried out on sample survey basis.

Input Survey

1.1.16 The scope of the 1976-77 Agriculture Census was also widened to include a separate Input Survey to obtain information on the use of various inputs such as fertiliser, manures, pesticides, Agriculture implements and machinery, livestock for five broad size groups of operational holdings, viz. marginal, small, semi-medium, medium and large.

1.2 Agriculture Census as part of Agricultural Statistics

1.2.1 Agriculture Census in India forms part of broader system of collection of Agricultural Statistics. It is a large scale, periodic, Government sponsored operation for collection and derivation of quantitative information about the structural aspect of agriculture in the country.

The basic unit of collecting data in Agriculture Census is the 'Agriculture Operational Holding' as distinct from 'Ownership Holding'. This is so as the operational holding is the fundamental unit of decision making in agricultural planning. Agriculture Census is conducted in most parts of the country, where detailed village land records exist, on complete enumeration basis by retabulating the data available in these records into the prescribed schedules for Agriculture Census by consolidating the information of all parcels of each of the operational holding, in the village of residence of the operational holder. In the States where detailed land records do not exist, the Agriculture Census is carried out through sample surveys by household inquiry approach.

1.2.2 Agriculture Census in India coordinated by the Agriculture Census Division of the Ministry of Agriculture requires a high degree of coordination, technical expertise, statistical control and supervision over the States. The data collected through Agriculture Census is in the nature of supplement to the current Agricultural Statistics. Under the current Agricultural Statistics, coordinated by the Directorate of Economics & Statistics of the Ministry of Agriculture, data on area, yield and production estimates are generated every year, for different seasons and details are also available for a variety of crops. The current statistics, however, provide for broad aggregates for various administrative units but not by size classes, social groups, types of holdings and gender. In planning for Agricultural development in the country, the data pertaining to various categories of farmers such as marginal, small, semi-medium, medium and large are important and it is this specific aspect that is attempted through Agriculture Census to provide data by various size classes, social groups, types of holding and gender and thus, compliments the current Agricultural Statistics in the country.

1.2.3 The Agriculture Census is, however, restricted to information on number of operational holdings and the area operated thereof with attendant details on tenure, land use, irrigation, cropping pattern and scatteredness of holdings. The census does not go into yield and production aspects which are of immediate interest for Agriculture policies and are thus covered under current Agriculture Statistics. On the other hand, the Agriculture Census is designed mainly to get an idea of the structure of the Agriculture economy as such which can be had from a study of the changing pattern of the operational holdings. As the changes in the pattern are not so rapid, the Agriculture Census is conducted at longer intervals. In India, agriculture is the most important activity and a periodical assessment of the changing pattern once in five years to review and formulate programmes in each Five Year Plan is considered adequate and imperative. On the recommendation of the National Commission on Agriculture,

the Agriculture Census in India is carried out at an interval of five years during each plan period although World Census of Agriculture (WCA) of FAO are in favour of conducting Agriculture Census once in ten years. Thus, there is complete complementarity between the two collections viz. Current Agriculture Statistics and quinquennial Agriculture Census.

1.2.4 The Agriculture Census is conducted in three phases. In Phase I, all the operational holdings in the country are enumerated and results giving number and area of operational holdings at various administrative levels like Block/Tehsil, District and State are generated according to various social groups, size classes, types of holdings and gender. In Phase II, only 20 percent of the villages in each Tehsil or Block are selected and detailed information on aspects such as tenancy, land use, irrigation, cropping pattern of all the operational holdings of these selected villages is collected. In Phase III of the Agriculture Census which is known as Input Survey, the data is collected on use of different inputs from selected holdings of selected villages (7 per cent).

1.2.5 So far ten Agriculture Censuses, at five yearly intervals, starting from 1970-71 have been completed. In addition to Agriculture Census, an Input Survey is also conducted in the following year of the Agriculture Census at the interval of five years to collect information on use of various inputs like fertilizers, manures, Agriculture credit, implements and machinery, seeds etc. So far nine Input Surveys since 1976-77 have been completed.

CHAPTER 2

Concepts, Definitions, Methodology and Scope of Census Data

2.1 Operational Holding

2.1.1 All land which is used wholly or partly for Agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

2.2 Technical Unit

2.2.1 A technical unit has been defined as the unit which is under the same management and has the same means of production such as labour force, machinery, animals, credit etc.

2.3 Agricultural Production

2.3.1 Agricultural production includes growing of field crops including jute, oilseeds, fodder grass, seeds, tree nurseries (except those of forest trees), fruits, vegetables and flowers, plantation crops (coffee, tea, cocoa, rubber) etc.

2.3.2 Grass would be treated as a crop if special efforts are made to raise it.

2.4 *DE FACTO* Versus *DE JURE* Position

2.4.1 In most of the States, land records comprising records of the rights, tenancy and crop inspection of each survey number are maintained in various registers/forms by the revenue official, namely, Patwaris. In these States, generally Agriculture Census data are compiled on the basis of retabulation approach. The question that arose in adopting this approach was about the reliability of data regarding tenancy particulars, as the *de facto* position may be different from *de jure* position. The *de facto* position related to what was actually the situation on the ground. In order to get reliable data on *de facto* position, the concerned States undertook updating of records on the eve of the Census to reduce *de jure* error. However, marginal differences may still exist though the primary workers were generally knowledgeable enough to record accurately the actual situation as far as possible.

2.5 Operated area

2.5.1 Operated area includes both cultivated and uncultivated area, provided part of it is put to Agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-Agricultural

uses, the total area of the operational holding is equal to the total geographical area of all the four survey numbers.

2.5.2 It would also cover the land occupied by the farm buildings, including the house of the holder, provided such buildings are located within the operated area. If the farms buildings are located outside the cultivated area and are covered under abadi area, such area of buildings are not included under operated area.

2.5.3 Operated area exclude government forest land, government waste land, village common grazing land, abadi area etc. If Government wasteland is allotted to an individual then it is included in the holding.

2.5.4 If the entire area of the holding (the area of all the survey numbers of an operational holding) is put to non-Agriculture use and/or it is under old fallow, it is not considered as operational holding. If, however, the entire area of operational holding is under current fallow during the reference year but was cultivated in the preceding year, this is still considered as operational holding.

2.5.5 In some cases, land is divided amongst all the members of the family. Where it is divided between the husband, wife and minor children and the cultivation is done by the husband as the head of the family, the land may appropriately be treated as one operational holding.

2.5.6 There might be cases where in the records, a holding is shown jointly in the name of more than one co-sharer while in fact the land may have been privately divided and the co-sharers are independently cultivating. In such cases where there is no dispute, they are treated as many operational holdings as the number of independent cultivators. This is because in Agriculture Census the data is collected on the basis of *de facto* position rather than *de jure* position.

2.5.7 In some States, in the Zamabandi register against a Khata, name of three or four persons are shown. While from the records it appears that there is only one holding, in practice, all the three or four brothers are actually cultivating the land independently of each other although there is no legal partition of land. From the Census point of view, this constituted three or four operational holdings.

2.5.8 Cultivated areas in the State Forests for which no detailed land records are available with the revenue agency, are excluded for Census purposes.

2.5.9 The operated area comprise of:

- i) Land owned and self-operated.
- ii) Land leased in.
- iii) Land otherwise operated.

2.5.10 **Land owned and self-operated:** Land for which the cultivator has the right to permanent heritable possession is considered as owned. This include:

- i) Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer.
- ii) Land operated under perpetual lease.

Self-operated land include:

- i) Self cultivation
- ii) Land cultivated through members of the family.
- iii) Land cultivated with the help of hired labour. Land owned and self operated should not include land leased out to others.

2.5.11 **Leased in:** Area leased in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for:

- i) Fixed money
- ii) Fixed produce
- iii) Share of produce
- iv) Usufructuary mortgage: Ownership of the property remains with the mortgager but the possession is with the mortgagee (i.e. the person to whom the mortgage is made or given). Income from the property accrues to the mortgagee and the mortgage is terminated as soon as the full amount is realized.
- v) Other terms: It includes combination of two or more terms of leasing.

Data on the above mentioned aspects i.e. 'terms of leasing' were, however, not collected during Agriculture Census 2015-16.

2.5.12 **Area otherwise operated:** This include encroachment, land forcibly occupied, unauthorized or land in dispute etc., which cannot be treated as owned or leased in, as per the definitions given above.

2.6 Operational holder

2.6.1 An Operational holder is the person who has the responsibility for the operation of the Agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder may be Individual/Joint/ Institutional.

- i) **Individual:** If the holding is being operated either by one person alone or by group of persons who are the members of the same household, it is considered as an individual holding.
- ii) **Joint:** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an Agricultural holding, such holding are considered as joint.
- iii) **Institutional:** Holdings such as government farms, sugarcane factories farms, cooperative farms, lands managed by trust is treated as institutional.

2.7 Resident and Non-resident operational holder

2.7.1 All the cultivators residing in a particular village and cultivating some land within the same tehsil are resident cultivators of that village irrespective of the fact whether they are cultivating land in that village or not. A resident cultivator may, therefore, have: either (i) entire area of the holding located in the village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence.

2.7.2 An operational holder operating area outside the tehsil in which his village of residence falls, will not be treated as a resident cultivator of the village of his residence for Agriculture Census purposes rather he will be treated as a resident cultivator of that village outside the tehsil where the area falls.

2.7.3 If the area in a particular village is operated by a cultivator who resides outside that village but within the same tehsil, he is a non-resident operational holder for that area. However, if this operational holder is resident of a village lying outside the tehsil in which the area is located, he is treated as a resident operational holder (deemed resident) of the village where the area is located.

2.8 Complete/Part-Holding

2.8.1 A holding is said to be complete holding if the entire operated area of that holding is located in one village. If the operated area is spread over more than one village, it is considered as part-holding.

2.8.2 Tehsil/Block is taken as the outer limit for consolidation of part holdings.

2.9 Wholly Irrigated, Partly Irrigated and Wholly Unirrigated Holdings

2.9.1 If the entire net area sown in an operational holding is equal to net area irrigated, such holdings are considered as wholly irrigated holding. In case part of the net sown area is irrigated, it is partly irrigated and if the entire sown area has not received any irrigation during the year of reference, such holding are wholly unirrigated.

2.10 Land Utilization

2.10.1 Operated area is classified into six broad categories:

- i) Net area sown
- ii) Current fallow
- iii) Fallow land other than current fallow
- iv) Other uncultivated land excluding fallow land
- v) Culturable waste; and
- vi) Not available for cultivation.

2.10.2 **Net area sown:** Total area sown with crops and orchards counting area sown more than once in the same year only once.

2.10.3 **Current fallow:** Cropped area, which are kept fallow during the current year but was cultivated in the previous year. For example if seedling area is not cropped in the same year, it may be treated as current fallow.

2.10.4 **Fallow land other than current fallow:** All lands, which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years i.e. equal or greater than one year but less than or equal to five years.

2.10.5 **Other uncultivated land excluding fallow:** This include:-

- i) *Permanent pastures and other grazing lands:* All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands is, however, excluded.
- ii) *Land under Miscellaneous Tree Crops:* Cultivable land, which is not included in the net area sown but is put to some Agricultural use. Land under casuarina trees,

thatching grasses, bamboo bushes and other groves for fuel which are not included under 'Orchards', are covered under this category.

2.10.6 *Culturable Waste:* All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other i.e. more than 5 years in succession. Such lands may be either wholly or partly covered with shrubs and jungles, which are not put to any use. Land once cultivated but not cultivated for five years in succession are also included in this category.

2.10.7 *Not available for cultivation:* This include Forest, area under non-Agriculture use, barren and uncultivable land belonging to the operational holder.

- i) *Forest:* All lands classed as 'Forests' under any legal enactment dealing with forests or administered as forests whether State owned or private and whether weeded or maintained as potential forest land. The area of crops raised in the forest and grazing land or areas open for grazing within the forests would be included under the forest area. Only private forest is covered for the purpose of Agriculture Census.
- ii) *Area under Non-Agricultural Uses:* All lands occupied by buildings or ponds or lands put to use other than agriculture is included in this category. Only such lands within the cultivated holding of operational holder should be covered in the Census.
- iii) *Barren and Uncultivable Land:* All barren and uncultivable land within the cultivated holding of the operational holder should be covered in the Census.

The categories of operated area, other than net area sown and current fallow were clubbed together and shown under 'uncultivated area' for collection of data in Agriculture Census 2015-16.

2.11 Methodology adopted for Agriculture Census

2.11.1 The methodology adopted for carrying out the Agriculture Census for Land Record and non-Land Record States is as follows:-

a) *Land Record States*

- i) In States having comprehensive land records, information was collected on complete enumeration basis for all villages by retabulation method from the land records in respect of data on number and area of operational holdings. For collection of data on other characteristics, namely, tenure and tenancy, leased in area, land use,

irrigation, area under different crops, etc., 20 percent of the villages selected randomly from each tehsil constituted the basis. In these 20 percent villages, information relating to the above characteristics were compiled from the relevant Khatauni and Khasra registers in respect of all the resident cultivators. Resident cultivators of urban areas were also covered. These 20 percent villages were the same as selected under Time Reporting Scheme (TRS) of current Statistics.

ii) In most of the States in India, a fairly comprehensive system of land records consisting of various village forms and registers giving detailed information, on land and its utilisation exists. The current Agricultural statistics, particularly those in respect of cropwise area of individual fields, are collected and cropwise abstracts prepared for the village as a whole for each cropping season. These data are then aggregated at successive levels like Patwari circle to revenue inspector circle, to tehsil, district, State and all-India levels. In Agriculture Census, the data available in the village land records, is required to be retabulated for generating information on the holdings. The procedure adopted for retabulation of data in States where retabulation approach is adopted, differs from State to State depending on the land records system followed. By and large, the Patwari consults the Khasra register and notes down the name of the cultivator against each Khasra number and places together the survey number/sub-survey numbers cultivated by the same cultivator. Some of the other existing land records like Khatauni are also used in preparing the list of cultivators. The names of cultivators not owning but operating the land are added with the help of Khasra register.

b) *Non-Land Records States*

i) In States where comprehensive land records do not exist and where the system of crop enumeration on a complete field-to-field basis is not in vogue, sample surveys through household enquiries were conducted to provide information on all the items covered by the Census.

ii) In the non-land records States, namely, Arunachal Pradesh, Goa, Kerala, Manipur, Mizoram, Meghalaya, Nagaland, Orissa, Sikkim, Tripura and West Bengal and the Union Territories of Daman and Diu and Lakshadweep, no village revenue agency exists for collection of crop statistics on a regular basis. In these States and Union Territories, a stratified two-stage sampling, design was followed for Agriculture Census. The development block was generally taken as the stratum. The first stage unit within the stratum was the village and the second stage unit was the operational holding

in the sample village. From each stratum, at least 20 percent of the villages were selected by simple random sampling method. A sample of 25 percent of the operational holdings from each of the categories of the holdings on the basis of circular systematic sampling method and all the holdings from the last two size-classes was selected. Detailed information was collected from these sampled operational holdings. However, for Table-1, that is, Number and Area of Operational Holdings, all the holdings in the sample village were taken for estimation of total number of holdings and area operated.

iii) In smaller States and Union Territories, where comprehensive land records were not available, the information was collected from a larger sample of villages than 20 percent.

iv) In each State/Union Territory referred to above, household enquiry method was adopted for collection of data. All the Agriculture households in selected villages were listed for enquiry. The sample size varied from State to State depending upon the prevalent local conditions.

v) Two different set of schedules which were used to compile the data in Agriculture Census 2015-16 are available in separate manuals for land record States/UTs and non-land record States/UTs.

2.12 Size Classes and Broad Size Groups of Holdings

2.12.1 The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings.

S.No.	Size-Groups	Classes (in hectares)
I.	Marginal	1. Below 0.50
		2. 0.50 – 1.00 (0.50 < 1.00)
II.	Small	3. 1.00 – 2.00 (1.00 < 2.00)
III.	Semi-Medium	4. 2.00 – 3.00 (2.00 < 3.00)
		5. 3.00 – 4.00 (3.00 < 4.00)
IV.	Medium	6. 4.00 – 5.00 (4.00 < 5.00)
		7. 5.00 – 7.50 (5.00 < 7.50)
		8. 7.50 – 10.00 (7.50 < 10.00)
V.	Large	9. 10.00 – 20.00 (10.00 < 20.00)
		10. 20.00 and above

CHAPTER 3

SAMPLING DESIGN, ESTIMATION PROCEDURE AND LIMITATION OF DATA

(A) Sampling Design

3.1 Land Record States

3.1.1 In States where comprehensive land records exist, data on number and area of operational holdings according to different size-classes, social groups, types of holdings and gender of operational holder, is collected and compiled on complete enumeration basis through retabulation of information available in the Village Land Records. This implies covering all survey numbers within each village and preparing a list of 'Operational Holdings' therefrom. An operational holding is the basic unit of enumeration. The holding of the actual cultivator and not the owner is the unit for collection of data. Some holdings may not be located completely within the village and these may be spread over to other villages. For preparation of a list of operational holdings, necessary matching of the part-holdings scattered over more than one village has to be done. A holding may cut across boundary of a village/Patwari circle/Revenue Inspector Circle/Tehsil/District/State. A Tehsil is the outer limit for pooling of all the parcels of an operational holding. If a holding is spread over more than one Tehsil, that part of the holding which is lying outside the Tehsil of residence of operational holder is treated as a separate operational holding.

3.1.2 For the purpose of pooling of part holdings, the criterion adopted is the residence of the operational holder, but this is applicable to only those persons who are residing within the Tehsil. If operator is residing outside the Tehsil then, for the purpose of the Census, he is considered as resident operator of the village where his holding is located, and his holding in the village is treated as a separate operational holding. Necessary pooling of the part holdings has been done before preparation of Table-1 giving number of holdings and area operated for all the villages in the stratum.

3.1.3 For collection of detailed data, viz. (i) distribution of holdings according to the tenancy status; (ii) area under different land uses; (iii) distribution of holdings according to irrigation status and (iv) area under principal crops, 20 percent of the villages selected randomly constituted the base. These 20 percent villages were those selected for Timely Reporting Scheme (TRS) for the reference year of Agriculture Census. In these 20 percent villages,

information relating to the above characteristics is compiled from the basic village land records, viz., Khatauni and Khasra in respect of all the resident cultivators. Resident cultivators of urban areas are also covered.

3.1.4 On the basis of the data obtained from 20 percent of the villages, tables are generated at the Taluk/District/State levels after adopting suitable estimation procedure as applicable in the case of Land Record States.

3.1.5 All the data is compiled separately for the operational holdings of the four groups, viz., Scheduled Castes, Scheduled Tribes, Others, Institutional and also the Total of all these groups. However, Table-1 is prepared gender-wise also.

3.2 Non-Land Record States

3.2.1 A stratified two stage sampling design is adopted for Agriculture Census in the Non-Land record States. In view of increasing demand of Agriculture Census data at Block Level, it has been decided that the Community Development Block or some other similar homogenous administrative unit should be taken as the stratum. The first stage unit within the stratum is the village and the second stage unit is the operational holding. In the States where geographical dispersion of the village is not much, at least 20% of the villages are selected by simple random sampling method from each stratum. These sample villages include all villages selected under the scheme for Establishment of an Agency for Reporting Agricultural Statistics (EARAS). In States where less than 20 percent villages are selected for EARAS, additional villages are selected using random sampling to bring up the percentage of selected villages in each stratum to recommended level of 20 percent. For example, if only 15 percent villages have been selected for EARAS, additional 5 percent villages in each stratum are selected and added to the list of EARAS villages, to get the list of villages where Agriculture Census has to be conducted.

3.2.2 In case of all holdings other than institutional holdings, the second stage sampling is to be done in the States for canvassing Holding Schedule (H).

3.2.3 All the institutional holdings in the selected village are included in the sample for filling Holding Schedule (H).

3.2.4 For adoption of common software for tabulation, it is necessary that all the Non-Land record States follow the above sampling design. However, variations in the size of the sample at the two stages may be warranted to suit the pattern of distribution of holdings and/or villages

in the States as also to ensure the presence of adequate number of units of each type in the sample.

3.2.5 The sampling of operational holdings is done separately for Scheduled Castes/Scheduled Tribes/Others categories of operational holders as estimates are to be worked out separately for each of these categories.

(B) Estimation Procedure

3.3 Land Record States adopting Stratified Unistage sampling design

3.3.1 The estimation procedure for population totals and their sampling errors at Taluk as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of States having comprehensive Land Records is given below:

The estimate used is “Ratio Estimate in Simple Random Sampling”.

- | | | | |
|----|----------------|---|--|
| a. | Let M | - | be the number of Taluks in a district. |
| b. | $y_{ij}(k)$ | - | Sum total of the values of characteristic under study for all holdings in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class) |
| c. | $x_{ij}(k)$ | - | Total number of operational holdings/total operated area in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class) (auxiliary variate) |
| d. | $N_i(k)$ | - | total No. of villages in the i^{th} Taluk, each village having at least one holding in k^{th} size class |
| e. | $n_i(k)$ | - | Number of selected villages in i^{th} Taluk, each village having at least one holding in the k^{th} size class. |
| f. | $R_i(k)$ | - | Ratio of sample total of $y_{ij}(k)$ to that of $x_{ij}(k)$ in the i^{th} Taluk. |
| g. | $x_{i(k)}$ | - | Total number of operational holdings/Total operated area in the i^{th} Taluk for k^{th} size class (whichever is applicable) based on complete enumeration. |
| h. | $\hat{y}_i(k)$ | - | The estimate of characteristic under study for i^{th} Taluk for k^{th} size class. |
| i. | $\hat{y}_D(k)$ | - | The estimate of characteristic under study for the district for k^{th} size class. |

Note:- Taluk and Tehsil are synonymous terms.

The estimate of characteristic under study for i^{th} Taluk for k^{th} size class viz. $\hat{y}_i(k)$ is given by

$$\hat{y}_i(k) = \frac{\sum_{j=1}^{n_i(k)} y_{ij}(k)}{\sum_{j=1}^{n_i(k)} x_{ij}(k)} x_i(k) = R_i(k) \cdot x_i(k)$$

The estimate of characteristic under study for the district for k^{th} size class viz. $\hat{y}_D(k)$ is given by

$$\hat{y}_D(k) = \sum_{i=1}^M \hat{y}_i(k) = \sum_{i=1}^M \left[\frac{\sum_{j=1}^{n_i(k)} y_{ij}(k)}{\sum_{j=1}^{n_i(k)} x_{ij}(k)} \right] x_i(k) = \sum_{i=1}^M R_i(k) \cdot x_i(k)$$

The estimate of variance of $\hat{y}_i(k)$ is given by:

$$\hat{v}[\hat{y}_i(k)] = \frac{N_i(k)[N_i(k) - n_i(k)]}{n_i(k)[n_i(k) - 1]} \sum_{j=1}^{n_i(k)} (y_{ij}(k) - R_i(k) \cdot x_{ij}(k))^2$$

The estimate of variance of $\hat{y}_D(k)$ is given by:

$$\hat{v}[\hat{y}_D(k)] = \sum_{i=1}^M \frac{N_i(k)[N_i(k) - n_i(k)]}{n_i(k)[n_i(k) - 1]} \sum_{j=1}^{n_i(k)} (y_{ij}(k) - R_i(k) \cdot x_{ij}(k))^2$$

The percentage standard error of the estimate is given by:

$$\%S.E.(\hat{y}_D(k)) = \frac{\sqrt{\hat{v}(\hat{y}_D(k))}}{\hat{y}_D(k)} \times 100.$$

3.4 Non-Land Record States adopting Stratified two stage sampling design with systematic sampling at the second stage

3.4.1 The estimation procedure for estimating the population totals and their sampling errors with regard to specific characteristics relating to number of operational holding and operated area in respect of the Non-Land record States is given below:

The estimate used is “Simple Mean”.

1. Let M be the number of Taluks in a district.
2. $Y_{ijp}(k)$ Value of characteristic in p^{th} holding of j^{th} village of the i^{th} Taluk in k^{th} size class.
3. N_i Total number of villages in the i^{th} Taluk.
4. n_i Number of sampled villages in the i^{th} Taluk.
5. $N_i(k)$ Total number of villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
6. $n_i(k)$ Number of selected villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
7. $N_{ij}(k)$ Number of holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
8. $n_{ij}(k)$ Number of sampled holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
9. $\hat{Y}_i(k)$ The estimate of characteristic under study for the i^{th} Taluk in k^{th} size class.
10. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for k^{th} size class.

The estimate of characteristic under study for i^{th} Taluk for k^{th} size class viz. $\hat{Y}_i(k)$ is given by:-

$$\hat{Y}_i(k) = \frac{N_i(k)}{n_i(k)} \sum_{j=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

$$\text{or, } \hat{Y}_i(k) = \frac{N_i}{n_i} \sum_{j=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k) \text{ (after approximation)}$$

$$\therefore \hat{Y}_D(k) = \sum_{i=1}^M \hat{Y}_i(k) = \sum_{i=1}^M \frac{N_i}{n_i} \sum_{j=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\begin{aligned} \hat{V}(\hat{Y}_i(k)) &= \frac{N_i^2(k)}{n_i(k)} S_i^2(k) = \frac{N_i^2(k)}{n_i^2(k)} \times n_i(k) \times S_i^2(k) \\ &= \left[\frac{N_i(k)}{n_i(k)} \right]^2 \times n_i(k) \cdot S_i^2(k) = \left(\frac{N_i}{n_i} \right)^2 n_i(k) S_i^2(k) \end{aligned}$$

$$\text{where } S_i^2(k) = \frac{1}{n_i(k) - 1} \sum_{j=1}^{n_i(k)} \left[t_{ij}(k) - \frac{\sum_{j=1}^{n_i(k)} t_{ij}(k)}{n_i(k)} \right]^2$$

$$\text{and } t_{ij}(k) = \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

$$\hat{V}\left(\hat{Y}_D(k)\right) = \sum_{i=1}^M \hat{V}\left(\hat{Y}_i(k)\right) = \sum_{i=1}^M \left(\frac{N_i}{n_i}\right)^2 \cdot n_i(k) S_i^2(k)$$

$$\%S.E.\left(\hat{Y}_D(k)\right) = \left[\frac{\sqrt{\hat{V}\left(\hat{Y}_D(k)\right)}}{\hat{Y}_D(k)} \right] \times 100$$

3.5 Non-Land Record States adopting stratified unistage sampling design (Non-Land record states)

3.5.1 The estimation procedure for estimating the population totals and their sampling errors at Taluk/Block as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of the non-land record States is given below:-

The estimate used is “Simple Mean”.

1. Let M be the number of Administrative Units/Gram Sevak Circle Blocks/Taluks in a district.
2. $Y_{ij}(k)$ Sum total of the values of characteristic under study for all the holdings in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class).
3. N_i Total number of villages in i^{th} Taluk.
4. n_i Number of selected villages in i^{th} Taluk.
5. $n_i(k)$ Number of selected villages in i^{th} Taluk, each village having at least one holding in k^{th} size class.
6. $\hat{Y}_i(k)$ The estimate of characteristic under study for i^{th} Taluk for K^{th} size class.
7. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for K^{th} size class.

The estimate of characteristic under study for i^{th} Taluk/Block for K^{th} size class viz., $\hat{Y}_i(k)$ is given by:

$$\hat{Y}_i(k) = \frac{N_i}{n_i(k)} \times \sum_{j=1}^{n_i(k)} \hat{Y}_{ij}(k)$$

$$\text{or, } \hat{Y}_i(k) = \frac{N_i}{n_i} \sum_{j=1}^{n_i(k)} Y_{ij}(k)$$

The estimate of characteristic under study for the district for k^{th} size class viz., $\hat{Y}_D(k)$ is given by:

$$\hat{Y}_D(k) = \sum_{i=1}^M \frac{N_i}{n_i} \left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\hat{V}(\hat{Y}_i(k)) = \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)^2}{n_i(k)} \right]$$

$$\hat{V}(\hat{Y}_D(k)) = \sum_{j=1}^M \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)^2}{n_i(k)} \right]$$

The percentage standard error of the estimate is given by:

$$\%S.E.(\hat{Y}_D(k)) = \left[\frac{\sqrt{\hat{V}(\hat{Y}_D(k))}}{\hat{Y}_D(k)} \right] \times 100$$

(C) Limitation of data

3.6.1 Figures for Telangana State which came into existence after 2010-11, were segregated from data of undivided Andhra Pradesh of Agriculture Census 2010-11 for making comparison with 2015-16.

CHAPTER 4

Agriculture Census Results – All India All Social Groups

(A) Operational holdings

4.1 Distribution of operational Holdings

4.1.1 The number of operational holdings has been continuously increasing since the first Agriculture Census in 1970-71. The number of holdings, which was 71.0 million in 1970-71 went to 81.6 million, 88.9 million, 97.2 million, 106.6 million, 115.6 million, 119.9 million, 129.2 million, 138.3 million and 146.5 in the successive censuses from 1976-77 to 2015-16. Thus the number of holdings, since the first Agriculture Census 1970-71 has shown a compound annual growth rate of 1.62 percent.

4.1.2 The operated area which was 162.3 million hectares in 1970-71, initially increased to 165.5 million hectares in 1990-91 and thereafter has shown a declining trend in general. Operated Area decreased over the years primarily due to diversion of agricultural land to non-agricultural uses like housing, industry and infrastructure.

4.1.3 The average size of holdings had shown a continuous decline over all the census periods from the fact that in 1970-71 it was 2.28 hectares, which reduced to 2.00 hectares in 1976-77, 1.84 hectares in 1980-81, 1.69 hectares in 1985-86, 1.55 hectares in 1990-91, which again declined to 1.41 hectares during 1995-96, 1.33 hectares in 2000-01, 1.23 hectares in 2005-06, 1.15 hectares in 2010-11 and 1.08 hectares in 2015-16.

4.1.4 The data on number and area of operational holdings and average size of holdings by major size classes for all Social Groups since 1970-71 may be seen in Table 4.1. A graphical presentation of these characteristics of operational holdings may be seen in Figure 4.1, Figure 4.2 and Figure 4.3 respectively.

4.1.5 The number and area of operational holdings and average size of holdings by size-classes and gender in Agriculture Censuses 2010-11 and 2015-16 may be seen in Table 4.2.

Table 4.1: Number of holdings, operated area and average size of holdings - All Social Groups

	All Sizes	2.28	2.00	1.84	1.69	1.55	1.41	1.33	1.23	1.15	1.08

Note: (1) *excluding Jharkhand. (2) Total may not tally due to rounding off.

4.1.6 The total number of operational holdings in the country increased from 138.35 million in 2010-11 to 146.45 million in 2015-16, showing an increase of 5.86 percent. Male operational holdings (excluding Institutional) constituted 86.0 percent while female holdings were 14.0 percent in 2015-16 against 87.2 percent and 12.8 percent respectively in 2010-11. This indicates rising participation of females in management and/or operation of agricultural holdings in the country.

4.1.7 In terms of corresponding operated area, it was 159.59 million hectares in 2010-11 which decreased to 157.82 million hectares in 2015-16, showing a decrease of 1.11 percent. The proportion of operated area managed by female operational holders (excluding Institutional) stood at 11.8 percent in 2015-16 against 10.4 percent in 2010-11 while the same proportion by males was 88.2 percent in 2015-16 against 89.6 percent in 2010-11.

Table 4.2: Number of operational holdings, area operated and average size of holding by size-classes and gender for All social groups during Agriculture Census 2010-11 and 2015-16

Sl. No.	Size Class (in Ha.)	Number (in '000)			Area (in '000 ha.)			Avg. size of holding (in ha.)

Note: (1) *includes Institutional Holdings. (2) Total may not tally due to rounding off. (3) Figures in brackets relate to Agriculture Census 2010-11.

4.1.8 The average size of operational holding in Agriculture Census 2015-16 was 1.08 hectares against 1.15 hectares in 2010-11 whereas the same relating to male and female operational holdings in 2015-16 was 1.10 hectares and 0.90 hectares against 1.18 hectares and 0.93 hectares in 2010-11 respectively. The average operated area per holding in 'all size-classes' had thus decreased in general in 2015-16 as compared to 2010-11.

4.1.9 The small and marginal holdings (below 2.00 ha.) constituted 86.08 percent in 2015-16 against 85.01 percent in 2010-11 and had 46.94 percent of operated area in the current Census as against the corresponding figure of 44.58 percent in 2010-11 in the country. The semi-medium and medium operational holdings (2.00 ha. – 9.99 ha.) were 13.35 percent with operated area of 44.00 percent. The corresponding figures for 2010-11 census were 14.29 percent and 44.82 percent. The large holdings (10.00 ha. & above) were only 0.57 percent of total number of holdings in 2015-16 with a share of 9.06 percent in the operated area as against 0.70 percent and 10.59 percent in 2010-11 respectively.

Figure 4.1: Total Number of Operational Holdings in India by Size Groups for All Social Groups, 1970-71 to 2015-16 (in '000)

Figure 4.2: Total Area of Operational Holdings in India by Size Groups for All Social Groups, 1970-71 to 2015-16 (area in '000 ha.)

Figure 4.3: Average Size of Land Holdings in India by Size Groups for All Social Groups, 1970-71 to 2015-16 (in ha.)

4.2 Tenancy of operational holdings

4.2.1 In Agriculture Census, operational holdings are categorized according to different tenurial characteristics. For instance, these categories are – (1) wholly owned and self-operated, (2) wholly leased-in, (3) wholly otherwise operated, (4) partly owned and partly leased in, (5) partly owned and partly otherwise operated, (6) partly leased in and partly otherwise operated and (7) partly owned, partly leased in and partly otherwise operated. The area ‘otherwise operated’ relates to area occupied and operated by the operational holder by encroachment or through forcible occupation of Government/private land or land under litigation or land acquired by Government but being operated by the holder.

4.2.2 The distribution of number and area of operational holdings by Tenancy status according to major size groups of holdings for all social groups in 2015-16 may be seen in the Table 4.3 and Table 4.4 respectively. The above-mentioned last four categories of holdings have been clubbed and shown under ‘Others’ in these tables for analytical purpose.

Table 4.3: Distribution of number of operational holdings in India by Tenancy status in Major Size Classes for All Social Groups, 2015-16

(Number in ‘000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	100251 (100.00)	97795 (97.55)	454 (0.45)	156 (0.16)	1846 (1.84)
2	Small	25809 (100.00)	25214 (97.69)	56 (0.22)	20 (0.08)	519 (2.01)
3	Semi-medium	13993 (100.00)	13831 (98.84)	15 (0.11)	8 (0.06)	139 (0.99)
4	Medium	5561 (100.00)	5485 (98.62)	5 (0.10)	4 (0.06)	68 (1.22)
5	Large	838 (100.00)	811 (96.70)	1 (0.13)	1 (0.08)	26 (3.09)
All Size Classes		146454 (100.00)	143135 (97.73)	531 (0.36)	189 (0.13)	2598 (1.77)

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Total may not tally due to rounding off.

Table 4.4: Distribution of Area Operated by Tenancy status in India in Major Size Classes for All Social Groups, 2015-16

(Area in ‘000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	37923 (100.00)	36603 (96.52)	216 (0.57)	67 (0.18)	1038 (2.74)
2	Small	36151 (100.00)	35233 (97.46)	84 (0.23)	29 (0.08)	805 (2.23)
3	Semi-medium	37619 (100.00)	37173 (98.81)	40 (0.11)	23 (0.06)	384 (1.02)
4	Medium	31810 (100.00)	31358 (98.58)	31 (0.10)	21 (0.07)	400 (1.26)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
5	Large	14314 (100.00)	13876 (96.95)	30 (0.21)	12 (0.08)	395 (2.76)
	All Size Classes	157817 (100.00)	154244 (97.74)	400 (0.25)	152 (0.10)	3021 (1.91)

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Total may not tally due to rounding off.

4.2.3 According to Table 4.3, wholly owned and self-operated holdings accounted for 97.73 percent. The wholly leased in holdings were merely 0.36 percent while wholly otherwise operated holdings were at the minimum of 0.13 percent. The remaining categories of holdings shown under 'Others' represented 1.77 percent of the total number of operational holdings.

4.2.4 From Table 4.4, it may be seen that while wholly owned and self-operated area was at the maximum of 97.74 percent, wholly leased-in area, wholly otherwise operated area and area under 'Others' formed only 0.25 percent, 0.10 percent and 1.91 percent, respectively of the total operated area of 157.82 million hectares in 2015-16.

(B) Land use

4.3 Land Utilisation

4.3.1 The total operated area under different types of land use during various Agriculture Census years may be seen in Table 4.5.

Table 4.5: Area under different forms of Land Use in India for All Social Groups during various Agriculture Censuses

Sl. No.	Forms of land use	Area (in '000 hectare)									
		1970-71	1976-77	1980-81	1985-86	1990-91	1995-96	2000-01*	2005-06#	2010-11	2015-16
1	2	3	4	5	6	7	8	9	10	11	12
1	Total operated area	162124 (100.00)	157555 (100.00)	163792 (100.00)	164529 (100.00)	165507 (100.00)	163355 (100.00)	152410 (100.00)	132067 (100.00)	159592 (100.00)	157817 (100.00)
2	Net area sown	135822 (83.80)	128544 (81.60)	136641 (83.40)	137428 (83.50)	140413 (84.80)	141062 (86.35)	132677 (87.05)	115855 (87.72)	141279 (88.52)	140036 (88.73)
3	Current fallows	9257 (5.70)	13316 (8.40)	11446 (7.00)	12594 (7.70)	12246 (7.40)	12070 (7.39)	11338 (7.44)	10271 (7.78)	11514 (7.21)	11805 (7.48)
4	Net cultivated area (2+3)	145079 (89.50)	141860 (90.00)	148087 (90.40)	150022 (91.20)	152659 (92.20)	153132 (93.74)	144015 (94.49)	126126 (95.50)	152793 (95.74)	151841 (96.21)
5	Uncultivated area	16983 (10.50)	15693 (10.00)	15705 (9.60)	14507 (8.80)	12848 (7.80)	10221 (6.25)	8395 (5.51)	5941 (4.50)	6799 (4.26)	5977 (3.79)

Note: (1) Figures in brackets are percentages to total operated area. (2) * excluding Bihar, Jharkhand and Meghalaya (3) # excluding Bihar, Jharkhand and Maharashtra. (4) Total may not tally due to rounding off.

4.3.2 A graphical comparison of area under different forms of land use between Agriculture Censuses 2015-16 and 2010-11 may be seen in Figure 4.4.

4.3.3 The total operated area has been decreasing gradually after 1990-91 to 2005-06 because of diversion of land for urbanisation; industrialisation or transfer of land to meet the increasing requirement for non-agricultural uses, like, housing projects, infrastructure development etc. However, there is a marginal increase in the operated area from 158.32

million ha. excluding Jharkhand (based on T-1 data) in 2005-06 to 159.59 million ha. in 2010-11 showing an increase of 0.80%. The operated area has primarily increased in 2010-11 because of the State of Jharkhand participated for the first time in Agriculture Census operation in 2010-11 after the State came into being in the year 2000. Further, it is observed that the percentage of net area sown over last two census periods (2010-11 and 2015-16) has rallied around 89.0 percent of the operated area. The net cultivated area increased from 89.5 percent during 1970-71 to 96.2 percent during 2015-16, whereas uncultivated area declined from 10.5 percent to 3.8 during the same period.

**Figure 4.4: Area Under Different Forms of Land Use for All Social Groups
2010-11 and 2015-16 (in percentage)**

■ Net Area Sown ■ Current Fallow ■ Uncultivated Land

(C) Irrigation

4.4 Irrigation Status

4.4.1 The availability of irrigation is reflected by percentage of irrigated area to net area sown, which is given in Table 4.6.

Table 4.6: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for All Social Groups during Agriculture Census 2010-11 and 2015-16

(Area in '000 ha.)

Sl. No.	Major size classes of holdings	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	3	4	5	6
1	Marginal	16835	18369	32219	34272	52.25	53.60
2	Small	14263	15153	31976	32606	44.61	46.47
3	Semi-medium	14995	15797	33778	33526	44.39	47.12
4	Medium	13266	13652	29442	27787	45.06	49.13
5	Large	5209	5263	13864	11845	37.57	44.43
All Size Classes		64567	68234	141279	140036	45.70	48.73

Note: Total may not tally due to rounding off.

4.4.2 The proportion of irrigated area to net area sown for all categories of holdings was 48.73 percent in 2015-16 as compared to 45.70 percent in 2010-11. The percentage of irrigated area to net area sown has thus increased in 2015-16 as compared to 2010-11 including in each major size-classes of holdings.

4.4.3 The graphical presentations of net irrigated area and net sown area in 2015-16 and percentage of net irrigated area to net sown area since 1970-71 may be seen in Figure 4.5 and Figure 4.6 respectively.

(D) Cropping Pattern, Cropping Intensity and Irrigation Intensity

4.5 Area under Principal Crops

4.5.1 The details of area under principal crops, both irrigated and un-irrigated for all social groups, in 2015-16 is given in Table 4.7.

Table 4.7: Area under Principal Crops for All Social Groups, 2010-11 and 2015-16

(Area in '000 ha.)

Sl. No.	Item	Irrigated Area		Unirrigated Area		Total Area	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16

19	Other non-food crops	879 (1.00)	842 (0.88)	1993 (1.88)	2256 (2.35)	2872 (1.48)	3099 (1.62)
20	All non-food crops (16+17+18+19)	13475 (15.35)	16015 (16.76)	32390 (30.56)	31734 (33.00)	45865 (23.67)	47749 (24.90)
21	Gross Cropped Area (15+20)	87768 (100.00)	95579 (100.00)	105992 (100.00)	96178 (100.00)	193759 (100.00)	191756 (100.00)
22	Net Area Sown	64567 (73.57)	68234 (71.39)	76711 (72.37)	71802 (74.66)	141279 (72.91)	140036 (73.03)
23	Intensity of Cropping / Irrigation Intensity (21/22)	1.3593	1.4008	1.3817	1.3395	1.3715	1.3693

Note: (1) Figures in brackets indicate percentages to Gross Cropped Area. (2) Total may not tally due to rounding off.

Figure 4.5: Net Irrigated and Net Sown Area by Size Groups for All Social Groups, 2015-16

Figure 4.6: Percentage of Net Irrigated Area to Net Sown Area by Size Groups for All Social Groups, 1970-71 to 2015-16

4.5.2 During 2015-16, gross cropped area was estimated at 191.76 million hectares while net sown area was at 140.04 million hectares whereas corresponding figures in 2010-11 were found at 193.76 million hectares and 141.28 million hectares indicating a shortfall of 1.03 percent and 0.88 percent. The cropping intensity during 2015-16 and 2010-11 remained static at 1.37 although the irrigation intensity which is the ratio of gross irrigated area to net irrigated area increased from 1.36 in 2010-11 to 1.40 in 2015-16.

4.5.3 Further, cereals formed 56.31 percent of gross cropped area in 2015-16 while 'all food crops' consisting of cereals, pulses, sugar crops, spices, fruits & vegetables, accounted for 75.1 percent. The remaining gross cropped area was covered by non-food crops, like, oilseeds, fibres, fodder crops and other non-food crops accounting for 24.9%. Among non-food crops, oilseeds had the highest share of 13.2 percent followed by fibres (6.6 percent) at all India level.

CHAPTER 5

AGRICULTURE CENSUS RESULTS- ALL INDIA SCHEDULED CASTES AND SCHEDULED TRIBES

(A) OPERATIONAL HOLDINGS

5.1 Distribution of Operational Holdings

5.1.1 The information on characteristics of agricultural operational holdings of Scheduled Castes and Scheduled Tribes was collected separately for the first time during Agriculture Census, 1980-81 to facilitate policy decisions for welfare of these social groups. The number of operational holdings and area operated by various social groups in 2010-11 and 2015-16 are presented in Table 5.1. The graphical presentation may be seen in Figure 5.1 and Figure 5.2 respectively.

Table 5.1: Number of Operational Holdings and Area Operated by Social Groups, 2010-11 and 2015-16

Sl. No.	Social Groups	Number of Holdings (in '000)		%age variation in 2015-16 over 2010-11	Area Operated (in '000 ha.)		%age variation in 2015-16 over 2010-11
		2010-11	2015-16		2010-11	2015-16	
1	2	3	4	5	6	7	8
1	Scheduled Castes	17099 (12.36)	17341 (11.84)	1.42	13721 (8.60)	13481 (8.54)	-1.75
2	Scheduled Tribes	12005 (8.68)	12669 (8.65)	5.53	18221 (11.42)	17784 (11.27)	-2.40
3	Others	109006 (78.79)	116180 (79.33)	6.58	126108 (79.02)	125012 (79.21)	-0.87
4	Institutional	239 (0.17)	264 (0.18)	10.54	1542 (0.97)	1540 (0.98)	-0.11
5	All Social Groups	138348 (100.00)	146454 (100.00)	5.86	159592 (100.00)	157817 (100.00)	-1.11

Note: (1) Figures in brackets indicate percentages. (2) Totally may not tally due to rounding off.

5.1.2 The holdings operated by Scheduled Castes accounted for 11.84 percent of the total number of holdings in the country in 2015-16 as against 12.36 percent in 2010-11. The proportion of operated area to the total operated area in the country for this social group remained almost static at 8.6 percent during 2010-11 and 2015-16. The Scheduled Tribes holdings accounted for 8.7 percent of total holdings in both 2010-11 and 2015-16. The proportion of operated area held by Scheduled Tribes has, however, marginally decreased from 11.42 percent in 2010-11 to 11.27 percent in 2015-16. In the case of 'Other' Social Group, the proportions of number of holdings in 2015-16 and 2010-11 stood at 79.33 percent and 78.79 percent respectively while the share of operated area was 79.21 percent in 2015-16 against 79.02 percent in 2010-11. The number of operational holdings has increased but there was a decrease in operated area in every social group including Institutional in 2015-16 when compared with 2010-11.

Figure 5.1: Number of Operational Holdings in India by Social Groups, 2015-16 (in percentage)

Figure 5.2: Area operated by holdings in India by Social Groups, 2015-16 (in percentage)

5.1.3 The number and area of operational holdings and average size per holding by size-classes and gender, and their percentage distribution in Agriculture Censuses 2015-16 and 2010-11 for holdings of Scheduled Castes may be seen in Table 5.2 and Table 5.3 respectively with graphical presentation in Figure 5.3, Figure 5.4 and Figure 5.5 respectively.

Table 5.2: Number of operational holdings and area operated by size-classes and gender for Scheduled Castes during Agriculture Census 2015-16

Sl. No.	Size Class (in Ha.)	Number (in '000)			Area (in '000 ha.)			Avg. size per holding (in ha.)

11	All Classes	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2010-11.

5.1.4 In a total of 17.34 million holdings belonging to Scheduled Castes in 2015-16, male operational holdings accounted for 86.57 percent while females 13.43 percent against 87.73 percent and 12.27 percent respectively in 2010-11. Thus the share of holdings operated by females were quite low as compared to that of male operational holdings. It is noteworthy, however, that representation of holdings belonging to females has increased from 12.27 percent in 2010-11 to 13.43 percent in 2015-16.

5.1.5 Area operated by female holders accounted for 11.75 percent in 2015-16 against 10.42 percent in 2010-11.

5.1.6 The average operated area by Scheduled Caste holders in Agriculture Census 2015-16 declined to 0.78 hectare from 0.80 hectare in 2010-11. The average operated area for male and female operational holdings in 2015-16 was 0.79 hectare and 0.68 hectare respectively as compared to 0.82 hectare and 0.68 hectare in 2010-11 indicating that average size of holdings of females remained unchanged while it came down for holdings belonging to males.

5.1.7 Out of a total of 17.34 million of operational holdings of Scheduled Castes in 2015-16, marginal holdings constituted (78.2 percent), small (14.1 percent), semi-medium (5.6 percent), medium (1.8 percent) and large (0.3 percent). It can be seen that bulk of operational holdings belonged to marginal and small categories i.e. 92.3 percent together (Table 5.3).

Figure 5.3: Number of Operational Holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2015-16 (in '000)

Figure 5.4: Area operated by holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2015-16 (area in '000 ha.)

Figure 5.5: Average Size of land holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2015-16 (area in ha.)

5.1.8 Out of a total of 13.48 million hectares of area operated by Scheduled Castes, over 1/3rd i.e. 36.8 percent belonged to the marginal category, as against their corresponding representation of 78.2 percent in number of holdings. The percentages of operated area belonging to small, semi-medium, medium and large holdings were 25.5, 19.2, 13.0 and 5.6 respectively.

5.1.9 The number and area of operational holdings and average size per holding by size-classes and gender, and their percentage distribution in Agriculture Censuses 2015-16 and 2010-11 for holdings of Scheduled Tribes may be seen in Table 5.4 and Table 5.5 respectively. The graphical presentation of number of holdings, area operated and average size of land holdings are available in Figure 5.6, Figure 5.7 and Figure 5.8 respectively.

11	All Classes	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2010-11.

5.1.10 As per Table 5.4, out of 12.67 million Scheduled Tribes operational holdings in 2015-16, males accounted for 87.3 percent and females constituted 12.7 percent. Thus, the percentage of female operational holdings was quite low as compared to male operational holdings. However, the representation of holdings belonging to females increased from 11.3 percent in 2010-11 to 12.7 percent in 2015-16.

5.1.11 The area operated by Scheduled Tribes which was 18.22 million hectares in 2010-11 fell to 17.78 million hectares in 2015-16, showing a decrease of 2.4 percent. The area operated by females accounted for 11.2 percent in 2015-16 while it was 88.8 percent for male holders against the corresponding figures of 10.0 percent and 90.0 percent in 2010-11.

5.1.12 The average operated area in 2015-16 reduced to 1.40 hectares against 1.52 hectares in 2010-11, while it was 1.43 hectares and 1.23 hectares in 2015-16 as compared to 1.54 hectares and 1.34 hectares in 2010-11 for male and female operational holdings respectively,

Figure 5.6: Number of Operational Holdings in India by Size Groups for Scheduled Tribes, 1980-81 to 2015-16 (in '000)

Figure 5.7: Area operated by holdings in India by Size Groups for Scheduled Tribes, 1980-81 to 2015-16 (area in '000 ha.)

Figure 5.8: Average size of land holdings in India by Size Groups for Scheduled Tribes, 1980-81 to 2015-16 (in ha.)

indicating a decline in average operated area in case of both male and female operational holdings in 2015-16 as compared to 2010-11.

5.1.13 It may be seen from Table 5.5 that out of a total of 12.67 million Scheduled Tribes operational holdings in 2015-16, marginal holdings accounted for 56.3 percent followed by small (23.5 percent), semi-medium (14.0 percent), medium (5.6 percent) and large (0.8 percent). The number of operational holdings, thus, decreased with increase in size of holdings.

5.1.14 Out of a total of 17.78 million hectares of operated area in 2015-16, 42.8 percent of it was held by marginal and small holdings, while it had a share of 79.8 percent in total number of operational holdings belonging to Scheduled Tribes under these two categories.

5.2 Tenancy of operational holdings

5.2.1 The distribution of number of operational holdings and area operated by Scheduled Castes in India by tenancy status for major size classes, in 2015-16 is given in Table 5.6 and Table 5.7 respectively.

Table 5.6: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Castes, 2015-16

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	13559 (100.00)	12870 (94.92)	170 (1.26)	24 (0.17)	495 (3.65)
2	Small	2452 (100.00)	2328 (94.95)	17 (0.70)	2 (0.09)	104 (4.25)
3	Semi-medium	974 (100.00)	959 (98.48)	3 (0.29)	1 (0.07)	11 (1.16)
4	Medium	309 (100.00)	303 (98.10)	1 (0.22)	Neg (0.05)	5 (1.63)
5	Large	48 (100.00)	46 (95.19)	Neg (0.26)	Neg (0.04)	2 (4.51)
All Size Classes		17341 (100.00)	16506 (95.18)	191 (1.10)	27 (0.15)	617 (3.56)

Note: (1) Figures in brackets indicate percentages within each category to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) Total may not tally due to rounding off.

5	Large	756 (100.00)	720 (95.25)	2 (0.24)	Neg (0.04)	34 (4.46)
All Size Classes		13481 (100.00)	12840 (95.25)	116 (0.86)	14 (0.11)	511 (3.79)

Note: (1) Figures in brackets indicate percentages within each category to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) Total may not tally due to rounding off.

5.2.2 The distribution of number of operational holdings and area operated by Scheduled Tribes by tenancy status for major size classes, in 2015-16 may be seen in Table 5.8 and Table 5.9 respectively.

Table 5.8: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Tribes, 2015-16

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	7127 (100.00)	6742 (94.60)	58 (0.82)	49 (0.69)	277 (3.89)
2	Small	2972 (100.00)	2851 (95.94)	7 (0.22)	8 (0.27)	106 (3.57)
3	Semi-medium	1771 (100.00)	1730 (97.66)	2 (0.08)	2 (0.14)	38 (2.12)
4	Medium	704 (100.00)	695 (98.73)	Neg (0.03)	1 (0.07)	8 (1.16)
5	Large	95 (100.00)	94 (99.16)	Neg (0.07)	Neg (0.02)	1 (0.76)
All Size Classes		12669 (100.00)	12112 (95.61)	67 (0.53)	60 (0.47)	430 (3.39)

Note: (1) Figures in brackets indicate percentages within each category to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) Total may not tally due to rounding off.

Table 5.9: Distribution of Area Operated by Tenancy status in each Major size Classes for Scheduled Tribes, 2015-16

(Area in '000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	3413 (100.00)	3194 (93.61)	30 (0.89)	23 (0.68)	165 (4.83)
2	Small	4202 (100.00)	4019 (95.66)	10 (0.24)	11 (0.27)	161 (3.83)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
3	Semi-medium	4752 (100.00)	4639 (97.61)	4 (0.08)	7 (0.14)	103 (2.16)
4	Medium	3984 (100.00)	3933 (98.72)	1 (0.03)	3 (0.07)	47 (1.17)
5	Large	1434 (100.00)	1422 (99.19)	1 (0.10)	Neg (0.02)	10 (0.69)
All Size Classes		17784 (100.00)	17208 (96.76)	47 (0.26)	45 (0.25)	485 (2.73)

Note: (1) Figures in brackets indicate percentages within each category to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) Total may not tally due to rounding off.

5.2.3 In case of Scheduled Castes, wholly owned and self-operated holdings accounted for 95.2 percent in terms of number with almost equal percentage of area of 95.3. The wholly leased-in operational holdings had a proportion of 1.1 percent covering 0.9 percent of area. The wholly otherwise operational holdings were 0.15percent having an operated area of 0.11 percent. The remaining four types of operational holdings as described elsewhere under 'Others', were to the extent of 3.6 percent of the total Scheduled Castes holdings operating an area of about 3.8 percent.

5.2.4 Among holdings of Scheduled Tribes, 95.6 percent of operational holdings were wholly owned and self-operated accounting for an area of 96.8 percent. The wholly leased-in holdings accounted for merely 0.5 percent operating an area of 0.3 percent. The wholly otherwise operational holdings constituted 0.47 percent with corresponding area of 0.25 percent while 'Others' represented 3.4 percent with an area of 2.7 percent. Thus, para 5.2.3 and para 5.2.4 suggest that over 95 percent of holdings in 2015-16 were owned and self-operated.

(B) Land Use

5.3 Land Utilisation

5.3.1 The distribution of area under different land uses in all size classes for holdings of Scheduled Castes and Scheduled Tribes in 2010-11 and 2015-16 are given in Table 5.10.

Table 5.10: Area under Main Land Uses to the Total Operated Area for Scheduled Castes and Scheduled Tribes, 2010-11 and 2015-16

(Area in '000 ha.)

Sl. No.	Particulars	Net cultivated area*		Uncultivated Area		Total Area	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	5	6	7	8
1	All Size Classes - Scheduled Castes	13263 (96.67)	13119 (97.31)	458 (3.33)	362 (2.69)	13721 (100.00)	13481 (100.00)

Sl. No.	Particulars	Net cultivated area*		Uncultivated Area		Total Area	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	5	6	7	8
2	All Size Classes - Scheduled Tribes	16503 (90.57)	16463 (92.57)	1718 (9.43)	1322 (7.43)	18221 (100.00)	17784 (100.00)

Note: (1) Figures in brackets are percentages. (2) * Net cultivated area is net area sown plus area under current fallow.

5.3.2 The proportion of net cultivated area to total operated area in case of holdings of Scheduled Castes had increased from 96.7 percent during 2010-11 to 97.3 percent during 2015-16. In other words, the proportion of uncultivated area reduced from 3.3 percent in 2010-11 to 2.7 percent in 2015-16.

5.3.3 The net cultivated area for holdings of Scheduled Tribes, as a percentage of total operated area increased from 90.6 percent during 2010-11 to 92.6 percent during 2015-16. The uncultivated land, thus, formed 7.4 percent of the total operated area during Agriculture Census 2015-16 which was lower than that of 9.4 percent of 2010-11.

(C) IRRIGATION

5.4 Irrigation Status

5.4.1 The distribution of net irrigated area and net sown area of holdings of Scheduled Castes and Scheduled Tribes by major size classes in 2010-11 and 2015-16 may be seen in Table 5.11 and Table 5.12 respectively.

Table 5.11: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Castes during Agriculture Census 2010-11 and 2015-16

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	5	6	7	8
1	Marginal	2432	2581	4365	4511	55.72	57.23
2	Small	1388	1467	3127	3140	44.40	46.74
3	Semi-medium	963	1031	2386	2341	40.33	44.04
4	Medium	597	636	1641	1551	36.41	40.98
5	Large	159	209	695	630	22.85	33.11
	All Size Classes	5539	5925	12214	12174	45.35	48.67

Note: Total may not tally due to rounding off.

Table 5.12: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Tribes during Agriculture Census 2010-11 and 2015-16

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	5	6	7	8
1	Marginal	696	901	2746	3045	25.34	29.58
2	Small	876	1081	3626	3721	24.17	29.04

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16
1	2	3	4	5	6	7	8
3	Semi-medium	962	1162	4071	4021	23.64	28.91
4	Medium	741	867	3262	3042	22.70	28.52
5	Large	196	264	1065	990	18.39	26.65
	All Size Classes	3471	4275	14770	14818	23.50	28.85

Note: Total may not tally due to rounding off.

5.4.2 In 'all size classes' of holdings, the percentage of net irrigated area to net sown area was much higher in the case of Scheduled Castes (48.7 percent) as compared to Scheduled Tribes (28.9 percent) in 2015-16. The similar pattern prevailed during Agriculture Census 2010-11 also. As such very large proportion of Scheduled Tribes holdings were either unirrigated or rain-fed. There was, thus, irrigation for holdings of Scheduled Castes improved by 3.3 percent whereas it improved by 5.4 percent in case of holdings of Scheduled Tribes between 2010-11 and 2015-16.

(D) Cropping Pattern

5.5 Area under Principal crops

5.5.1 Area under principal crops, as per Agriculture Census 2015-16, for holdings of Scheduled Castes and Scheduled Tribes may be seen in Table 5.13 and Table 5.14 respectively.

Table 5.13: Area under Principal Crops for Scheduled Castes, 2010-11 and 2015-16

(Area '000 ha.)							
Sl. No.	Item	Irrigated Area		Unirrigated Area		Total Area	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16

11	Spices	106 (2.67)	141 (2.88)	218 (1.54)	236 (1.79)	324 (1.78)	377 (2.08)
12	Fruits	53 (1.35)	75 (1.53)	206 (1.45)	215 (1.63)	259 (1.43)	290 (1.60)
13	Vegetables	123 (3.11)	185 (3.78)	241 (1.69)	290 (2.20)	364 (2.00)	476 (2.63)
14	Other Food Crops	2 (0.05)	- (0.00)	25 (0.18)	- (0.00)	27 (0.15)	- (0.00)
15	All Food Crops (9+10+11+12+13+14)	3405 (85.99)	4083 (83.22)	11415 (80.42)	10470 (79.33)	14820 (81.63)	14552 (80.38)
16	Oilseeds	450 (11.37)	555 (11.30)	1674 (11.79)	1617 (12.25)	2124 (11.70)	2171 (11.99)
17	Fibres	69 (1.74)	203 (4.13)	772 (5.44)	736 (5.57)	841 (4.63)	939 (5.18)
18	Fodder Crops	12 (0.31)	30 (0.62)	210 (1.48)	194 (1.47)	222 (1.22)	225 (1.24)
19	Other non-food crops	23 (0.59)	35 (0.72)	124 (0.88)	180 (1.37)	148 (0.81)	216 (1.19)
20	All non-food crops (16+17+18+19)	555 (14.01)	823 (16.78)	2780 (19.58)	2727 (20.67)	3334 (18.37)	3550 (19.61)
21	Gross Cropped Area (15+20)	3960 (100.00)	4906 (100.00)	14195 (100.00)	13198 (100.00)	18154 (100.00)	18104 (100.00)
22	Net Area Sown	3471 (87.66)	4275 (87.13)	11299 (79.60)	10543 (79.89)	14770 (81.36)	14818 (81.85)
23	Intensity of Cropping/Irrigation Intensity) (21/22)	1.1408	1.1477	1.2563	1.2518	1.2291	1.2217

Note: (1) Figures in brackets indicate percentages to Gross Cropped Area. (2) Total may not tally due to rounding off.

5.5.2 The net area sown for holdings of Scheduled castes was 12.17 million hectares in 2015-16 whereas the gross cropped area stood at 16.57 million hectares indicating a cropping intensity of 1.36. The percentage of net irrigated area to net sown area in 2015-16 was 48.7 while the irrigation intensity was 1.338. In a total of 16.57 million hectares of gross cropped area belonging to holdings of Scheduled Castes in 2015-16, the proportions of different groups/subgroups of crops constituted as cereals (57.64 percent), pulses (12.19 percent), sugar crops (1.88 percent), oilseeds (13.1 percent), fibres (5.41 percent) and fodder (4.25 percent). Thus, among non-food crops, oilseeds was the dominant crop (13.1 percent) followed by fibres (5.41 percent) etc.

5.5.3 For holdings of Scheduled Tribes, it may be observed that against net sown area of 14.82 million hectares in 2015-16, gross cropped area was 18.10 million hectares, indicating a cropping intensity of 1.222 and irrigation intensity at 1.148. The distribution of gross cropped area of 18.10 million hectares among different groups/subgroups of crops in 2015-16 found as cereals (63.65 percent), pulses (9.7 percent), spices & condiments (2.08 percent), vegetables

(2.63 percent), fruits (1.60 percent), oilseeds (12.0 percent), fibres (5.18 percent) and fodder crops (1.24 percent). Among the non-food crops, therefore, oilseeds was the most dominant crop having a share of 12.0 percent followed by fibres (5.2 percent) etc.

CHAPTER 6

State-wise Agriculture Census results – All Social Groups

6.1 Introduction

6.1.1 In the preceding chapters, data generated for Agriculture Census 2015-16 were analyzed at All India level for agricultural holdings of All Social Groups, Scheduled Castes and Scheduled Tribes holdings. In this chapter the results would be analyzed State-wise, for All Social Groups. In the subsequent Chapter 7, it would be taken up for holdings of Scheduled Castes and Scheduled Tribes.

(A) OPERATIONAL HOLDINGS

6.2 State-wise Distribution of Operational Holdings

6.2.1 As per Agriculture Census 2015-16, State-wise distribution of number and area of operational holdings may be seen in Table 6.1 and Table 6.2 and the corresponding graphical presentations in Figure 6.1 and Figure 6.2 respectively.

Table 6.1: Statewise distribution of number of operational holdings for All Social Groups during Agriculture Census 2010-11 and 2015-16

Sl. No.	States/UTs	Number (in '000)						% variation in 2015-16 over 2010-11		
		2010-11			2015-16			Male	Female	Total

(5) Total may not tally due to rounding off.

6.2.2 Out of a total of 146.45 million holdings in the country during 2015-16, Uttar Pradesh accounted for largest number of holdings, 23.82 million (16.3 percent), followed by

Figure 6.1: Number of Operational Holdings (Total and Female) by Top Eighteen States - 2015-16 (in '000)

Figure 6.2: Area of Operational Holdings (Total and Female) by Top Eighteen States - 2015-16 (area in '000 ha.)

Bihar 16.41 million (11.2 percent), Maharashtra 15.29 million (10.4 percent), Madhya Pradesh 10.0 million (6.8 percent), Karnataka 8.68 million (5.9 percent), Andhra Pradesh 8.52 million (5.8 percent), Tamil Nadu 7.94 million (5.4 percent), Rajasthan 7.66 million (5.2 percent), Kerala 7.58 million (5.2 percent), West Bengal 7.24 million (5.0 percent), Telangana 5.95 million (4.1 percent), Gujarat 5.32 million (3.6 percent) and Odisha 4.87 million (3.3 percent). Uttar Pradesh was the highest during Agriculture Census 2010-11 (16.9 percent) also. These thirteen States, thus, constituted over 88.0 percent of the total number of holdings in the country during 2015-16.

6.2.3 In a total of 20.44 million female operational holdings, Andhra Pradesh accounted for the highest proportion of 12.6 percent followed by Maharashtra (11.6 percent), Bihar (11.2 percent), Uttar Pradesh (8.9 percent), Karnataka and Kerala (8.5 percent each), Tamil Nadu (7.6 percent), Telangana (6.7 percent), Madhya Pradesh (5.8 percent), Gujarat (4.3 percent), Rajasthan (3.8 percent) and Chhattisgarh (2.7 percent), thus, these 12 States together (1/3rd of total number of States) constituted over 92.0 percent of total number of operational holdings belonging to females in the country in 2015-16. Similarly, out of a total of 125.75 million male operational holdings, Uttar Pradesh constituted 17.5 percent followed by Bihar (11.2 percent), Maharashtra (10.3 percent), Madhya Pradesh (7.0 percent), West Bengal (5.6 percent), Tamil Nadu (5.1 percent), Karnataka and Rajasthan (5.5 percent each), Andhra Pradesh (4.7 percent), and Kerala (4.6 percent). The variations in 2015-16 over 2010-11 relating to male and female operational holdings at all India level were 4.4 percent and 15.6 percent, respectively.

6.2.4 A comparison of number of operational holdings in 2015-16 over 2010-11 within a State indicated mixed trend. In all the States except ten States of Goa, Jammu & Kashmir, Manipur, Mizoram, Sikkim, Tamil Nadu, Tripura, Uttarakhand, Daman & Diu and Lakshadweep, there was an increase in number of holdings between these two Census periods. The number of operational holdings had increased from 138.35 million in 2010-11 to 146.45 million in 2015-16 showing an increase of 5.9 percent at all India level.

6.2.5 In terms of operated area, (Table 6.2), Rajasthan had the highest proportion of 13.2 percent in the country (though it stood 8th among States/UTs in-terms of number of operational holdings in 2015-16) followed by Maharashtra (13.0 percent), Uttar Pradesh (11.1 percent), Madhya Pradesh (9.9 percent), Karnataka (7.5 percent), Gujarat (6.3 percent), Andhra Pradesh (5.1 percent), Bihar (4.1 percent), Tamil Nadu (3.8 percent) and West Bengal (3.5 percent). Out of a total of 18.49 million ha. area operated by female holders in the country, the State of

Maharashtra had the highest proportion of 15.6 percent followed by Andhra Pradesh (11.8 percent), Karnataka (11.4 percent), Rajasthan (9.0 percent), Gujarat (8.6 percent), Madhya Pradesh (8.2 percent), Tamil Nadu (5.6 percent), Uttar Pradesh (5.5 percent) and Bihar (4.8 percent). As far as operated area belonging to male operational holders, Rajasthan had the highest proportion of 13.9 percent followed by Maharashtra (12.7 percent), Uttar Pradesh (11.9 percent), Madhya Pradesh (10.3 percent), Karnataka (7.0 percent), Gujarat (6.0 percent), Andhra Pradesh (4.2 percent), Bihar (4.0 percent), West Bengal (3.7 percent), Tamil Nadu (3.5 percent), Telangana (3.4 percent), Chhattisgarh and Odisha (3.2 percent each). There was a declining trend of operated area in 2015-16 over 2010-11 at all India level as well as in every State except few, like, Bihar, Gujarat, Maharashtra, Manipur, Meghalaya, Mizoram and Dadra & Nagar Haveli.

6.3 Tenancy

6.3.1 The State-wise distribution of number of operational holdings of all social groups by tenancy in 2015-16 may be seen in Table 6.3.

Table 6.3: Statewise distribution of number of holdings for All Social Groups by Tenancy Status, 2015-16

(Number in '000)

Sl. No.	States/UTs	Wholly owned & self operated	Wholly leased-in	Wholly other-wise operated	Others	Total
1	2	3	4	5	6	7

	All India	143135 (97.73)	531 (0.36)	189 (0.13)	2598 (1.77)	146454 (100.00)

Note: (1) Neg – Negligible i.e. less than 500. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

6.3.2 In a total of 146.45 million estimated operational holdings during Agriculture Census 2015-16, wholly owned and self-operated holdings had the highest share of 97.7 percent at all India level. In Arunachal Pradesh, Gujarat, Haryana, Karnataka, Mizoram, Chandigarh, Daman & Diu, Delhi and Lakshadweep all the holdings were owned and self-operated. In other States, where almost all the holdings (above 99.0 percent) belonged to owned and self-operated category were Andhra Pradesh, Bihar, Chhattisgarh, Himachal Pradesh, Jharkhand, Madhya Pradesh, Maharashtra, Nagaland, Rajasthan, Tamil Nadu, Telangana, Tripura, Uttarakhand, Uttar Pradesh, Andaman & Nicobar Islands and Dadra & Nagar Haveli.

6.3.3 The proportion of wholly leased-in holdings with respect to total number of operational holdings in some of the non-land record States like, Goa, Manipur, Odisha, Sikkim and West Bengal was quite higher than other States including land record States and all India average of 0.36 percent.

6.3.4 The wholly otherwise operated holdings which include encroachment, land forcibly occupied, unauthorized land or disputed land, etc., accounted for only 0.13 percent of the total number of operational holdings in the country. Among States, Goa had the highest proportion of such holdings being at 5.21percent followed by Jammu & Kashmir (1.63 percent), Odisha (1.10 percent), Meghalaya (0.79 percent), West Bengal (0.57 percent) and Rajasthan (0.22 percent).

6.3.5 As regards 'Others' States, like Assam (3.93 percent), Goa (1.9 percent), Manipur (4.12 percent), Meghalaya (4.87 percent), Odisha (12.79 percent), Punjab (5.9 percent), West Bengal (21.9 percent) and Puducherry (2.36 percent) were having higher representation than all India average of 1.77 percent.

6.3.6 The State-wise distribution of operated area of 'all social groups' by tenancy status in 2015-16 is given in Table 6.4.

Table 6.4: Statewise distribution of operated area for All Social Groups by Tenancy Status, 2015-16

(Area in '000 ha)

36	Puducherry	18 (86.81)	Neg (0.78)	0 (0.00)	3 (12.41)	21 (100.00)
	All India	154244 (97.74)	400 (0.25)	152 (0.10)	3021 (1.91)	157817 (100.00)

Note: (1) Neg – Negligible i.e. less than 500. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

6.3.7 The distribution of operated area in States according to tenancy status followed almost similar pattern as the number of operational holdings. In Arunachal Pradesh, Gujarat, Haryana, Karnataka, Mizoram, Chandigarh UT, Daman & Diu, Delhi and Lakshadweep, all the area of holdings were owned and self-operated. In States like, Andhra Pradesh, Bihar, Chhattisgarh, Himachal Pradesh, Jharkhand, Madhya Pradesh, Maharashtra, Nagaland, Tamil Nadu, Telangana, Tripura, Uttarakhand, Uttar Pradesh, Andaman & Nicobar Islands and Dadra & Nagar Haveli almost entire operated area (99.0 percent and above) was reported under owned and self-operated category.

6.3.8 The proportion of wholly leased-in area in relation to total operated area was higher in the States of Andhra Pradesh, Goa, Kerala, Manipur, Odisha, Punjab, Sikkim, West Bengal and Puducherry than all India average of 0.25 percent.

6.3.9 The proportion of wholly otherwise operated area was the highest in Goa (5.32 percent) followed by Jammu & Kashmir (2.02 percent), Odisha (0.79 percent) and West Bengal (0.39 percent) which were also above the national average of 0.1 percent.

6.3.10 The proportion of operated area under 'Others' category was the highest in West Bengal (21.1 percent) followed by Odisha (15.7 percent), Puducherry (12.4 percent), Punjab (9.3 percent), Goa (5.8 percent), Assam (5.4 percent), Manipur (5.2 percent), Meghalaya (5.0 percent), Kerala (3.9 percent) and Jammu & Kashmir (3.2 percent)

(B) LAND USE

6.4 Land Utilization

6.4.1 The State-wise area, in percentage, under main land use categories for ‘all social groups’ in 2010-11 and 2015-16 may be seen in Table 6.5.

Table 6.5: Statewise percentage distribution of area under main land use for All Social Groups, 2010-11 and 2015-16

Sl. No.	States/UTs	Net cultivated area		Land unutilized		Total	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16

26	Tripura	90.04	91.07	9.96	8.93	100.00	100.00
27	Uttar Pradesh	99.36	99.41	0.64	0.59	100.00	100.00
28	Uttarakhand	93.64	94.94	6.36	5.06	100.00	100.00
29	West Bengal	96.90	97.30	3.10	2.70	100.00	100.00
30	Andaman & Nicobar Islands	73.04	76.26	26.96	23.74	100.00	100.00
31	Chandigarh	96.89	96.88	3.11	3.12	100.00	100.00
32	Dadra & Nagar Haveli	98.42	99.00	1.58	1.00	100.00	100.00
33	Daman & Diu	90.35	96.04	9.65	3.96	100.00	100.00
34	Delhi	99.43	98.44	0.57	1.56	100.00	100.00
35	Lakshadweep	87.56	82.76	12.44	17.24	100.00	100.00
36	Puducherry	92.31	96.76	7.69	3.24	100.00	100.00
	All India	95.74	96.21	4.26	3.79	100.00	100.00

Note: Total may not tally due to rounding off.

6.4.2 The percentage of net cultivated area to total operated area in 2015-16 in the States of Andhra Pradesh (97.0 percent), Assam (97.0 percent), Chhattisgarh (96.6 percent), Goa (99.4 percent), Gujarat (99.97 percent), Haryana (99.9 percent), Karnataka (98.9 percent), Madhya Pradesh (97.8 percent), Manipur (99.98 percent), Mizoram (100.0 percent), Odisha

(99.5 percent), Punjab (100.0 percent), Tamil Nadu (97.1 percent), Uttar Pradesh (99.4 percent), West Bengal (97.3 percent), Chandigarh (96.9 percent), Dadra & Nagar Haveli (99.0 percent), Delhi (98.4 percent) and Puducherry (96.8 percent) was higher than the national average of 96.2 percent while Nagaland had its lowest proportion (57.7 percent) among all the States.

6.4.3 Land Unutilized stood at 3.8 percent of the total operated area at national level in 2015-16. In the States of Arunachal Pradesh (29.7 percent), Himachal Pradesh (35.5 percent), Kerala (15.7 percent), Nagaland (42.3 percent), Sikkim (16.6 percent), Andaman & Nicobar Islands (23.7 percent) and Lakshadweep (17.2 percent), the proportion of unutilized land varied as much as between 15.7 percent in Kerala to 42.3 percent in Nagaland. The States, like, Bihar, Jammu & Kashmir, Jharkhand, Maharashtra, Meghalaya, Rajasthan, Telangana, Tripura, Uttarakhand and Daman & Diu had also proportion of uncultivated area higher than the national average of 3.8 percent but below 9.0 percent at the maximum.

(C) IRRIGATION

6.5 Irrigation Status

6.5.1 The percentage of net irrigated area to net area sown in each State, as per Agriculture Census 2010-11 and 2015-16, for 'all social groups' is shown in Table 6.6.

Table 6.6: Percentage of net irrigated area to net sown area for All Social Groups, 2010-11 and 2015-16

Sl. No.	States/UTs	Net area sown		Net irrigated area		Percentage of NIA to NSA	
		2010-11	2015-16	2010-11	2015-16	2010-11	2015-16

All India		141279	140036	64567	68234	45.70	48.73

Note: (1) Total may not tally due to rounding off. (2) Neg – Negligible i.e. less than 500.

6.5.2 The net irrigated area as proportion of net sown area was 48.7 percent in the country in 2015-16 as compared to 45.7 percent in 2010-11. Chandigarh U.T. had the highest proportion of net irrigated area to net sown area (100.0 percent) in 2015-16 followed by Punjab (99.6 percent), Haryana (96.9 percent), Delhi (91.8 percent), Uttar Pradesh (83.2 percent), Puducherry (80.8 percent), West Bengal (68.2 percent), Tamil Nadu (62.2 percent), Bihar (61.4 percent), Madhya Pradesh (56.3 percent), Gujarat (54.2 percent), Jammu & Kashmir (50.1 percent), Uttarakhand (49.9 percent) and Andhra Pradesh (48.9 percent) and having their proportions above national level of 48.7 percent. This proportion for Rajasthan stood at 43.4 percent.

(D) CROPPING PATTERN

6.6 Gross Cropped Area

6.6.1 The State-wise gross cropped area and its distribution for 'all social groups' in 2015-16 is given in Table 6.7 and Table 6.8 respectively.

Table 6.7: Statewise Gross Cropped Area of All Social Groups, 2015-16

(Area in '000 ha)

Sl. No.	States/UTs	Gross Area Irrigated	Gross Area Unirrigated	Total

	All India	100.00	100.00	100.00	100.00	100.00	100.00

Note: (1) Total may not tally due to rounding off. (2) Neg – Negligible.

6.6.2 As per Table 6.7 and Table 6.8, Uttar Pradesh had the highest gross cropped area among all States/UTs in 2015-16 accounting for 26.9 million ha. (14.0 percent), followed by Rajasthan having 24.4 million ha. (12.8 percent), Madhya Pradesh 23.1 million ha. (12.1 percent), Maharashtra with 22.8 million ha. (11.9 percent), Karnataka 12.1 million ha. (6.3 percent), Gujarat 10.5 million ha. (5.5 percent) and West Bengal 9.2 million ha. (4.8 percent). These seven States together accounted for over 67.0 percent of total gross cropped area in the country.

6.6.3 From Table 6.8, it may also be seen that Uttar Pradesh had the highest gross irrigated area (22.4 percent) of total gross irrigated area in the country in 2015-16 followed by Madhya Pradesh (11.2 percent), Rajasthan (10.6 percent), Punjab (8.1 percent), Haryana (6.8 percent) and West Bengal, Gujarat and Bihar (over 5.5 percent each). The State of Maharashtra, had a 4.7% of gross irrigated area in the country during 2015-16.

6.6.4 The percentage distribution of gross cropped area between gross irrigated area and gross unirrigated area in each State in the country during 2015-16 for ‘all social groups’ may be seen in Table.6.9.

Table 6.9: Percentage distribution of Gross Cropped Area by irrigation in each State for All Social Groups, 2015-16

Sl. No.	States/UTs	Gross Irrigated Area	Gross Unirrigated Area	Gross Cropped Area
1	2	3	4	5
1	Andhra Pradesh	49.40	50.60	100.00
2	Arunachal Pradesh	18.67	81.33	100.00
3	Assam	5.91	94.09	100.00

Sl. No.	States/UTs	Gross Irrigated Area	Gross Unirrigated Area	Gross Cropped Area
1	2	3	4	5
4	Bihar	68.21	31.79	100.00
5	Chhattisgarh	29.32	70.68	100.00
6	Goa	29.31	70.69	100.00
7	Gujarat	51.85	48.15	100.00
8	Haryana	95.30	4.70	100.00
9	Himachal Pradesh	21.91	78.09	100.00

11	Jharkhand	14.92	85.08	100.00
12	Karnataka	30.42	69.58	100.00
13	Kerala	25.00	75.00	100.00
14	Madhya Pradesh	46.17	53.83	100.00
15	Maharashtra	19.52	80.48	100.00
16	Manipur	20.80	79.20	100.00
17	Meghalaya	23.21	76.79	100.00
18	Mizoram	13.86	86.14	100.00
19	Nagaland	17.97	82.03	100.00
20	Odisha	27.40	72.60	100.00
21	Punjab	99.64	0.36	100.00
22	Rajasthan	41.31	58.69	100.00
23	Sikkim	12.35	87.65	100.00
24	Tamil Nadu	62.30	37.70	100.00
25	Telangana	41.62	58.38	100.00
26	Tripura	27.35	72.65	100.00
27	Uttar Pradesh	79.52	20.48	100.00
28	Uttarakhand	50.39	49.61	100.00
29	West Bengal	59.36	40.64	100.00
30	Andaman & Nicobar Islands	1.86	98.14	100.00
31	Chandigarh	100.00	0.00	100.00
32	Dadra & Nagar Haveli	12.12	87.88	100.00
33	Daman & Diu	10.14	89.86	100.00
34	Delhi	88.72	11.28	100.00
35	Lakshadweep	0.00	100.00	100.00
36	Puducherry	79.72	20.28	100.00
	All India	49.84	50.16	100.00

Note: Total may not tally due to rounding off.

6.6.5 The percentage of gross irrigated area to gross cropped area was the highest in U.T. of Chandigarh (100.0 percent) in 2015-16 followed by Punjab (99.6 percent), Haryana (95.3 percent), Delhi (88.7 percent), Puducherry (79.7 percent), Uttar Pradesh (79.5 percent), Bihar (68.2 percent), Tamil Nadu (62.3 percent), West Bengal (59.4 percent), Gujarat (51.9 percent) and Uttarakhand (50.4 percent) having values more than the national average of 49.8 percent.

6.7 Intensity of Cropping

6.7.1 The State-wise intensity of cropping for 'All Social Groups' in 2015-16, may be seen in Table 6.10. Its graphic presentation is given in Figure 6.3.

Table 6.10: Statewise Intensity of Cropping of All Social Groups, 2015-16

(Area in '000 ha)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping

28	Uttarakhand	1086	656	1.6569	1.6567
29	West Bengal	9240	5174	1.7858	1.7224
30	Andaman & Nicobar Islands	14	13	1.0601	1.0049
31	Chandigarh	2	1	1.9656	1.9887
32	Dadra & Nagar Haveli	21	19	1.0910	1.0017
33	Daman & Diu	3	3	1.0038	1.0279
34	Delhi	40	23	1.7221	1.6536
35	Lakshadweep	2	2	1.0712	1.0005
36	Puducherry	26	15	1.7239	1.7035
	All India	191756	140036	1.3693	1.3715

Note: Total may not tally due to rounding off.

6.7.2 The cropping intensity which is the ratio of gross cropped area to net sown area at All India level in 2015-16 was estimated at 1.3693, slightly lower than 1.3715 of 2010-11. Among States/UTs, Punjab recorded the highest intensity of cropping of 1.9724 followed by Chandigarh (1.9656), Haryana (1.8942), Tripura (1.8140), West Bengal (1.7858), Puducherry (1.7239), Delhi (1.7221), Himachal Pradesh (1.6701), Uttarakhand (1.6569), Uttar Pradesh, (1.6310), Madhya Pradesh (1.5433) and Bihar (1.4254) having values above than the national average of 1.3693.

Figure 6.3: Intensity of Cropping in States and Union Territories - 2015-16

State-wise Area under Principal Crops

6.7.3 The State-wise distribution of area (in percent) under principal crops of 'All Social Groups' in 2015-16 is given in Table 6.11(a) and Table 6.11(b).

Table 6.11(a): Statewise Distribution of Percent of Area under Principal Crops (Food Crops) for All Social Groups, 2015-16

Sl. No.	States/UTs	Cereals	Pulses	Food grains	Sugar Crops	Spices & Condiments	Fruits	Vegetables	Total Food crops

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

6.7.4 Considering ‘all crops’ together, among States, Uttar Pradesh had the highest share of 14.0 percent of cropped area in the country, followed by Rajasthan (12.8 percent), Madhya Pradesh (12.1 percent), Maharashtra (11.9 percent), Karnataka (6.3 percent), Gujarat (5.5 percent), West Bengal (4.8 percent), Punjab (4.1 percent), Bihar (4.0 percent), Andhra Pradesh (3.9 percent), Haryana (3.6 percent), Tamil Nadu (3.1 percent) and Chhattisgarh (3.0 percent). These thirteen States together accounted for about 90.0 percent of the total cropped area in the country.

6.7.5 In the category of food crops, Uttar Pradesh topped the list with 17.7 percent of the total area under food crops in the country followed by Madhya Pradesh (10.5 percent), Rajasthan (10.1 percent) and Maharashtra (9.7 percent). The other important States were Karnataka (6.5 percent), West Bengal (5.5 percent), Bihar (5.3 percent), Punjab (4.9 percent), Haryana (4.0 percent), Chhattisgarh (3.8 percent), Andhra Pradesh (3.7 percent), Odisha (3.5 percent), Tamil Nadu (3.2 percent) and Gujarat (3.0 percent). Here the above mentioned fourteen States accounted for above 91.0 percent of the total area under food crops in the country.

6.7.6 With regard to area under oilseeds, Madhya Pradesh had the largest share of 28.9 percent of area under oilseeds in the country followed by Rajasthan (18.4 percent), Maharashtra (16.7 percent), Gujarat (10.5 percent), Karnataka (5.9 percent), Andhra Pradesh (4.0 percent), Uttar Pradesh (3.8 percent), Tamil Nadu (3.3 percent) and West Bengal (2.3 percent). These nine States, thus, covered nearly 94.0 percent of the total area under Oilseeds in the country.

Maharashtra had the highest proportion of 32.6 percent of the total area under fibre in the country followed by Gujarat (22.6 percent), Telangana (13.3 percent), Karnataka (6.0 percent), Andhra Pradesh (5.5 percent), West Bengal (5.0 percent), Haryana (3.8 percent), Rajasthan (3.7percent) and Madhya Pradesh (3.4 percent) forming together about 96.0 percent of fibre area in the country. As regards fodder crops, Rajasthan had 63.2 percent of the total area under fodder crops in the country followed by Gujarat (8.6 percent), Maharashtra (7.9 percent), Punjab (6.0 percent), Uttar Pradesh (5.1 percent) and Haryana (4.1 percent). The plantation crops comprising of tea, coffee, rubber etc. were reported, in terms of area, from Kerala (32.2 percent), Assam (21.8 percent), Karnataka (20.6 percent), Tamil Nadu (9.2 percent), West Bengal (7.6 percent) and Tripura (5.7 percent), covering 97.0 percent of total area under this category in the country. In the case of floriculture, Tamil Nadu had the highest share of 27.1 percent of area under the crop in the country followed by Karnataka (24.2 percent), Maharashtra (11.5 percent), Andhra Pradesh (10.5 percent), West Bengal (9.2 percent) and Telangana (4.0 percent). In the category of medicinal plants, Maharashtra had about 1/3rd (32.6 percent)of area in the country followed by Gujarat (22.6 percent), Telangana(13.3 percent), Karnataka (6.0 percent), Andhra Pradesh (5.5 percent), West Bengal (5.0 percent) and in the range of 3.0 to 4.0 percent in States, like, Madhya Pradesh, Rajasthan and Haryana.

CHAPTER 7

State-wise Agriculture Census results – Scheduled Castes and Scheduled Tribes

(A) OPERATIONAL HOLDINGS

7.1 State-wise Distribution of Operational Holdings of Scheduled Castes and Scheduled Tribes.

7.1.1 The State-wise distribution of number and area of operational holdings of Scheduled Castes in 2015-16 may be seen in Table 7.1 and Table 7.2 respectively. The State-wise distribution of number and area of operational holdings of Scheduled Tribes in 2015-16 is given in Table 7.3 and Table 7.4 respectively.

Table 7.1: Statewise distribution of number of operational holdings for Scheduled Castes during Agriculture Census 2010-11 and 2015-16

7.1.2 The number of operational holdings of Scheduled Castes in the country was 17.34 million during 2015-16 as against 17.10 million in 2010-11, showing an increase of 1.4 percent. The largest share of holdings of Scheduled Castes was in Uttar Pradesh (23.3 percent) followed by Bihar (11.1 percent), West Bengal (10.4 percent), Madhya Pradesh (6.8 percent), Rajasthan (6.0 percent), Maharashtra (5.9 percent), Karnataka (5.6 percent), Tamil Nadu (4.6 percent), Odisha (4.3 percent), Andhra Pradesh (4.2 percent), Telangana (4.0 percent) and Kerala (3.3 percent). Out of a total of 15.01 million male operational holdings belonging to Scheduled Castes, Uttar Pradesh accounted for about 24.8 percent followed by West Bengal (11.5 percent), Bihar (10.5 percent), Madhya Pradesh (6.9 percent), Rajasthan (6.3 percent), Maharashtra (5.7 percent), Karnataka (5.1 percent), Odisha (4.8 percent), Tamil Nadu (4.2 percent), Telangana (3.6 percent) and Andhra Pradesh (3.2 percent). These eleven States together constituted about 87.0 percent of the total male operational holdings belonging to Scheduled Castes in the country. Similarly, Bihar had highest proportion of female operational holdings (14.3 percent) in the country followed by Uttar Pradesh (13.6 percent), Andhra Pradesh (10.6 percent), Karnataka (8.8 percent), Maharashtra (7.5 percent), Tamil Nadu (7.2 percent), Kerala (7.1 percent), Telangana (6.8 percent), Madhya Pradesh (6.2 percent), Rajasthan (4.7 percent) and Chhattisgarh & West Bengal about 3.2 percent each. These twelve States together constituted above 93.0 percent of total female operational holdings belonging to Scheduled Castes in 2015-16 in the country.

7.1.3 As per Table 7.2, Rajasthan accounted for 18.0 percent of total operated area of Scheduled Castes holdings in 2015-16 in the country followed by Uttar Pradesh (14.3 percent), Madhya Pradesh (9.8 percent), Maharashtra (9.5 percent), West Bengal (8.3 percent) and Karnataka (7.8 percent). The States, like, Andhra Pradesh, Bihar, Chhattisgarh, Odisha, Tamil Nadu and Telangana had their proportions between 3.0 to 4.0 percent.

7.1.4 In a total of 1.58 million hectares of operated area of female Scheduled Castes operational holdings in 2015-16 in the country, Karnataka had the highest share of 13.8 percent

followed by Rajasthan (13.1 percent), Maharashtra (12.6 percent), Andhra Pradesh (10.2 percent), Madhya Pradesh (8.6 percent), Uttar Pradesh (8.4 percent), Telangana (7.6 percent), Bihar (6.4 percent), Tamil Nadu (6.1 percent) and Gujarat (3.3 percent). Thus, these ten States together accounted for about 90.0 percent of operated area of female holdings in the country. However, Rajasthan had the maximum share of area operated by males (18.7 percent) followed by Uttar Pradesh (15.1 percent), Madhya Pradesh (9.9 percent), West Bengal (9.2 percent), Maharashtra (9.1 percent), Karnataka (7.5 percent), Odisha (4.5 percent) and Bihar (4.0 percent). These eight States taken together accounted for 78.0 percent of the area operated by males belonging to Scheduled Castes in the country in 2015-16.

7.1.5 The total operated area held by Scheduled Castes decreased by 1.8 percent in 2015-16 over 2010-11 at all India level whereas there was an increase of 10.7 percent for females while a decline of 3.2 percent in case of male operational holders for the same period.

7.1.6 The total number of holdings of Scheduled Tribes in the country (Table 7.3) in 2015-16 was 12.67 million as against 12.00 million in 2010-11, indicating an increase of 5.5 percent. The Scheduled Tribes holdings were largely concentrated in States of Madhya Pradesh (15.8 percent) and Odisha (11.5 percent) accounting for more than one-fourth of total number of Scheduled Tribes holdings (27.3 percent) in the country. The other States having sizeable proportion of Scheduled Tribes holdings were Chhattisgarh (9.9 percent), Rajasthan (9.7 percent), Jharkhand (7.7 percent), Maharashtra (6.8 percent), Telangana (5.6 percent), West Bengal (4.7 percent) and Karnataka (4.1 percent). These nine States together accounted for about 76.0 percent of total Scheduled Tribes holdings in the country in 2015-16.

7.1.7 Out of a total of 1.6 million female operational holdings belonging to Scheduled Tribes, Madhya Pradesh had the highest proportion of 14.3 percent followed by Chhattisgarh (10.7 percent), Telangana (10.1 percent), Maharashtra (9.3 percent), Andhra Pradesh (7.8 percent), Karnataka (6.7 percent), Rajasthan (6.4 percent), Gujarat (5.7 percent), Odisha (5.2 percent), Meghalaya and Jharkhand (4.9 percent each), thus, accounting for 86.0 percent of female Scheduled Tribes operational holdings in the country. The male operational holdings in Madhya Pradesh and Chhattisgarh taken together accounted for above one-fourth of the total male operational holdings (25.8 percent) in the country. The other States, having substantial proportions of holdings, were Odisha (12.4 percent), Rajasthan (10.2 percent), Jharkhand (8.2 percent), Maharashtra (6.4 percent), West Bengal (5.1 percent) and Telangana (5.0 percent). The above

mentioned eight States, thus, accounted for 73.0 percent of total male operational holdings of Scheduled Tribes in the country in 2015-16.

7.1.8 While male holdings increased by 3.9 percent, female holdings rose by 18.6 percent resulting-in an overall increase of 5.5 percent in Scheduled Tribes holdings in 2015-16 over 2010-11 in the country.

7.1.9 In terms of area operated (Table 7.4), Madhya Pradesh and Chhattisgarh taken together accounted for about 30.0 percent of total area operated by Scheduled Tribes in the country in 2015-16. The other States in descending order were Rajasthan (9.9 percent), Odisha (8.7percent), Maharashtra (8.5 percent), Jharkhand (7.8 percent), Gujarat & Nagaland (5.4 percent each) and Telangana & Karnataka (4.1 percent each). The above mentioned ten States, thus, comprised of above 83.0 percent of total area operated by Scheduled Tribes in the country.

7.1.10 Further, out of 15.8 million hectares of operated area of male operational holders, Madhya Pradesh and Chhattisgarh had together about 30.0 percent of operated area followed by Rajasthan (10.4 percent), Odisha (9.2 percent), Jharkhand (8.3 percent), Maharashtra (8.0 percent), Nagaland (5.7percent) and Gujarat (5.0 percent). The substantial part of area operated by male Scheduled Tribes, i.e. 76.0 percent, concentrated only in these eight States.

7.1.11 The area operated by Scheduled Tribes females in Madhya Pradesh and Chhattisgarh constituted together 29.3 percent of operated area belonging to this category of holdings in the country. The other dominating States were Maharashtra (12.5 percent), Gujarat (8.9 percent), Telangana (8.5 percent), Karnataka (7.1 percent), Andhra Pradesh (5.8 percent), Rajasthan (5.4 percent), Meghalaya (4.2 percent) and Odisha (4.0 percent).The above mentioned ten States, thus, taken together accounted for about 86.0 percent of operated area of female operational holdings belonging to Scheduled Tribes in the country in 2015-16.

7.1.12 The area operated by females and males of Scheduled Tribes increased by 8.6 percent and decreased by 3.6 percent respectively with an overall decrease of 2.4 percent in 2015-16 as compared to the previous Agriculture Census 2010-11 at all India level.

7.2 Tenancy

7.2.1 The State-wise distribution of number and area of operational holdings, according to tenancy, for Scheduled Castes in 2015-16 may be seen separately in Table 7.5 and Table 7.6 respectively.

Table 7.5: Statewise distribution of number of holdings for Scheduled Castes by Tenancy Status, 2015-16

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

7.2.2 Among Scheduled Caste holdings, wholly-owned and self-operated holdings constituted 95.2 percent in terms of number and 95.3 percent in respect of operated area at all India level. In Gujarat, Haryana, Karnataka, Meghalaya, Dadra & Nagar Haveli, Daman & Diu and Delhi, all the holdings were wholly-owned and self-operated. In the States of Andhra Pradesh, Bihar, Chhattisgarh, Himachal Pradesh, Jharkhand, Madhya Pradesh, Maharashtra, Rajasthan, Tamil Nadu, Telangana, Tripura, Uttar Pradesh and Uttarakhand almost all holdings (above 99.0 percent) were recorded under wholly-owned and self-operated category with regard to both number and area of operational holdings except for Rajasthan and Tamil Nadu wherein respective percentages of area operated under this category were 97.7 and 98.5. The wholly leased-in holdings were only 1.1 percent accounting for 0.9 percent of operated area at all India level. The States which had proportions of wholly leased-in holdings in terms of number and area of operational holdings above the all India average of (1.1, 0.9) percent were Goa (6.0, 6.8) percent, Kerala (2.0, 1.4) percent, Manipur (4.1, 1.3) percent, Odisha (15.2, 13.1) percent, Punjab (3.7, 2.9) percent, Sikkim (2.2, 1.2) percent and West Bengal (3.0, 2.6) percent. The proportion of number of wholly otherwise operated holdings was higher than the national average of 0.15 percent in the States of Goa (4.5 percent), Jammu & Kashmir (4.2 percent), Kerala (0.3 percent), Odisha (1.1 percent), Tamil Nadu (0.17 percent) and West Bengal (0.3 percent). In these States except Kerala, the corresponding proportion of 'wholly otherwise' operated area was also higher than the all India average of 0.11 percent. In the category of 'Others' which has been defined under Chapter-IV, the

proportion of number of holdings to the total number of holdings in respective States was above all India average of 3.56 percent in States, like, Odisha (14.0 percent), Punjab (6.4 percent) and West Bengal (26.7 percent) only whereas the proportion of operated area to the total operated area was higher than the all India average of 3.79 percent in Assam (5.5 percent), Jammu & Kashmir (3.89 percent), Kerala (11.4 percent), Odisha (18.12 percent), Punjab (11.6 percent), West Bengal (28.6 percent) and Puducherry (10.1 percent).

7.2.3 The distribution of number of operational holdings as well as operated area of Scheduled Tribes in each State according to Tenancy in 2015-16 may be seen in Table 7.7 and Table 7.8 respectively.

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

7.2.4 Among Scheduled Tribes, wholly-owned and self-operated holdings constituted 95.6 percent in number and 96.8 percent in term of area at all India level. In States of Arunachal Pradesh, Bihar, Gujarat, Karnataka, Mizoram, Tamil Nadu, Daman & Diu and Lakshadweep, all Scheduled Tribes holdings were wholly-owned and self-operated whereas in States like Andhra Pradesh, Chhattisgarh, Jharkhand, Madhya Pradesh, Maharashtra, Manipur, Nagaland, Rajasthan, Telangana, Tripura, Uttarakhand and Uttar Pradesh, over 99.0 percent of the holdings fell under this category. In States like Andhra Pradesh, Jharkhand, Madhya Pradesh, Maharashtra, Manipur, Nagaland, Sikkim, Telangana, Tripura, Uttar Pradesh, Uttarakhand and Dadra & Nagar Haveli, over 99.0 percent of area of operational holdings also belonged to the category of owned & self-operated. The wholly leased-in holdings accounted for 0.53 percent of total number of holdings and 0.26 percent of operated area at all-India level. The States which had higher proportion of leased-in number of holdings than all India average of 0.53 percent were Goa (5.9 percent), Odisha (3.4 percent), Sikkim (1.2 percent) and West Bengal (1.8 percent). In terms of area under leased-

in holdings, the States having higher proportion than national average of 0.26 percent were Goa (3.1 percent), Kerala (0.27percent), Odisha (2.2 percent), Sikkim (0.6 percent) and West Bengal (1.5 percent). The States of Goa, Jammu and Kashmir, Kerala, Meghalaya, Odisha and West Bengal, had higher proportions of number of holdings than national average of 0.47 percent under ‘wholly otherwise operated’ category. Under ‘others’, States, like, Assam, Goa, Meghalaya, Odisha and West Bengal had represented higher proportions in number of holdings than national average of 3.39 percent. As regards ‘wholly otherwise operated’ area, States of Goa (8.8 percent), Jammu & Kashmir (4.8 percent), Kerala (0.42 percent), Odisha (1.6 percent) and West Bengal (0.38 percent) had higher percentage than all India average of 0.25. Similarly, against national average of 2.73 percent area under ‘others’, States, viz., Assam (6.5 percent), Goa (13.8 percent), Jammu & Kashmir (2.9 percent), Kerala (6.0 percent), Meghalaya (5.1 percent), Odisha (17.9 percent) and West Bengal (23.6 percent) had represented higher percentage in 2015-16.

(B) LAND USE

7.3 Land Utilization

7.3.1 The State-wise area, in percentage, under main land use/categories for holdings of Scheduled Castes and Scheduled Tribes in 2015-16 may be seen in Table 7.9 and Table 7.10 respectively.

Table 7.9: Statewise percentage distribution of area under main land use for Scheduled Castes, 2010-11 and 2015-16

	All India	90.57	92.57	9.43	7.43	100.00	100.00

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

7.3.2 The net cultivated area formed 97.3 percent of total operated area of Scheduled Castes and 92.6 percent of Scheduled Tribes at all-India level in 2015-16. Similarly, area of land uncultivated constituted 2.7 percent and 7.4 percent of operated area for Scheduled Castes and Scheduled Tribes respectively.

7.3.3 For Scheduled Castes holdings, Goa, Haryana, Meghalaya, Punjab, Dadra & Nagar Haveli and Delhi were the only States where the entire operated area was under cultivation during 2015-16. The percentage of net cultivated area to the total operated area was also higher than the national average of 97.3 in the States of Chhattisgarh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Manipur, Odisha, Tamil Nadu, Uttar Pradesh and Daman & Diu, while Kerala had the lowest proportion of 75.4 percent under cultivation among all the States/UTs. Kerala had also the highest figure of 24.6 percent of operated area under land unutilized followed by Sikkim (23.2 percent), Himachal Pradesh (22.5 percent) and Tripura (13.7 percent).

7.3.4 In case of Scheduled Tribes, entire operated area was under cultivation in Manipur and Mizoram during 2015-16, while in Nagaland, it was at the lowest (57.6 percent). Proportion of

land unutilized was at the highest in Nagaland (42.4 percent) followed by Arunachal Pradesh (29.9 percent), Himachal Pradesh (18.4 percent), Jammu & Kashmir (14.1 percent), Maharashtra (13.8 percent), Kerala (13.7 percent), Sikkim (12.1 percent) and Lakshadweep (12.0 percent) which are mostly hilly States.

(C) IRRIGATION

7.4 Irrigation Status

7.4.1 The percentage distribution of net irrigated area to net area sown in each State for holdings of Scheduled Castes and Scheduled Tribes in 2015-16 are given in Table 7.11 and Table 7.12 respectively.

Table 7.11: Percentage of net irrigated area to net sown area for Scheduled Castes, 2010-11 and 2015-16

(Area in '00 ha.)

Sl. No.	States/UTs	Net area sown		Net irrigated area		Percentage of NIA to NSA

All India		147702	148178	34709	42747	23.50	28.85

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

7.4.2 The proportion of net irrigated area to net area sown including wholly/partly irrigated holdings, of Scheduled Castes holdings in the country was 48.67 percent in 2015-16 against 45.35 percent in 2010-11. The percentage of net irrigated area to net sown area in 2015-16 was higher

than that of the all India average of 48.67 percent in States of Andhra Pradesh (50.4 percent), Bihar (64.0 percent), Haryana (100.0 percent), Jammu & Kashmir (49.3 percent), Madhya Pradesh (56.8 percent), Punjab (99.0 percent), Tamil Nadu (65.5 percent), Uttar Pradesh (83.4 percent), West Bengal (61.8 percent), Delhi (93.9 percent) and Puducherry (88.1 percent) and, thus, in the remaining States, it was below the national average of 48.67 percent.

7.4.3 The Scheduled Tribes holdings had much lower proportion of net area irrigated to net sown area (28.85 percent) as compared to respective percentages of Scheduled Castes (48.67 percent) and All Social Groups (48.73 percent) in 2015-16. The percentage of net irrigated area to net sown area was above the all India average of 28.85 percent in the States of Andhra Pradesh (38.0 percent), Bihar (56.1 percent), Gujarat (38.0 percent), Jammu & Kashmir (45.0 percent), Karnataka (32.7 percent), Madhya Pradesh (37.7 percent), Rajasthan (59.9 percent), Tamil Nadu (47.1 percent), Telangana (33.3 percent), Uttarakhand (74.8 percent), Uttar Pradesh (38.7 percent) and West Bengal (52.4 percent) and, thus, it was below in the remaining States as compared to national average of 28.9 percent.

(D) CROPPING PATTERN

7.5 Gross Cropped Area

7.5.1 The State-wise distribution of gross cropped area of holdings of Scheduled Castes in 2015-16 may be seen in Table 7.13 and Table 7.14.

7.5.2 From the Table 7.14 it may be seen that the largest share of 17.7 percent in gross cropped area of 16.6 million hectares in 2015-16 was held by Uttar Pradesh followed by Rajasthan (17.0 percent), Madhya Pradesh (11.6 percent), West Bengal (10.6 percent), Maharashtra (8.7 percent), Karnataka (6.7 percent), Odisha and Bihar (4.0 percent each), Chhattisgarh (2.8 percent), Andhra Pradesh (2.7 percent), Tamil Nadu and Telangana (2.6 percent each). In respect of gross irrigated area, here also Uttar Pradesh accounted for the highest proportion of 29.8 percent followed by Rajasthan (14.6 percent), West Bengal (11.9 percent), Madhya Pradesh (10.3 percent), Bihar (5.5 percent), Karnataka (3.6 percent), Punjab and Tamil Nadu (3.4 percent each).

7.5.3 The State-wise distribution of gross cropped area of holdings of Scheduled Tribes in 2015-16 is given in Table 7.15 and Table 7.16.

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

7.5.4 From Table 7.16, it may be seen that in gross cropped area of 18.1 million hectares, Madhya Pradesh alone contributed 21.2 percent followed by Rajasthan (12.6 percent), Chhattisgarh (12.2 percent), Odisha (8.9 percent), Maharashtra (8.3 percent), Gujarat (5.2 percent), Jharkhand (4.6 percent), Karnataka (4.0 percent), Telangana (3.6 percent) and Nagaland (3.0 percent). These ten States together accounted for about 84.0 percent of total gross cropped area of Scheduled Tribe holdings in the country. In case of irrigated area also, Madhya Pradesh had the highest proportion of 27.8 percent of total irrigated area followed by Rajasthan (19.9 percent), Gujarat (7.3 percent), Karnataka (4.9 percent), West Bengal (4.9 percent), Chhattisgarh (4.8 percent), Telangana (4.8 percent), Odisha (4.4 percent), and Maharashtra (3.5 percent).

7.6 Intensity of Cropping

7.6.1 The State-wise intensity of cropping of holdings of Scheduled Castes, in 2015-16, may be seen in Table 7.17.

Table 7.17: Statewise Intensity of Cropping of Scheduled Castes, 2015-16

(Area in '00 ha.)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping (3/4)

36	Puducherry	9	5	1.6006 (1.8468)
All India		165704	121737	1.3612 (1.4000)

Note: (1) Total may not tally due to rounding off. (2) Figures within brackets are for 2010-11.

7.6.2 The cropping intensity of holdings of Schedule Castes during 2015-16 at All India level was 1.36 percent against 1.40 for 2010-11 which showed a decline of 2.8 percent. Among States, Punjab recorded highest intensity of 1.9372 in 2015-16 followed by Delhi (1.77), West Bengal (1.67), Haryana (1.63), Puducherry, Uttar Pradesh and Jammu & Kashmir (1.60 each),

Uttarakhand (1.57), Madhya Pradesh (1.52), Sikkim (1.50), Himachal Pradesh (1.49) and Meghalaya (1.41) which were above the national average of 1.36.

7.7 State-wise Area under Principal Crops

7.7.1 The State-wise distribution, in percent, of area under principal crops of Scheduled Castes holdings during 2015-16, may be seen in Table 7.18(a)-Food Crops and Table 7.18(b)-Non-food Crops.

Table 7.18(a): Statewise Distribution of Percent of Area under Principal Crops (Food Crops) for Scheduled Castes, 2015-16

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

7.7.2 In case of Scheduled Castes holdings, for all crops taken together, among all the States, Uttar Pradesh had the highest proportion of 17.7 percent of total gross cropped area in the country followed by Rajasthan (17.0 percent), Madhya Pradesh (11.6 percent), West Bengal (10.6 percent), Maharashtra (8.7 percent), Karnataka (6.7 percent), Odisha and Bihar (4.0 percent each). These eight States together accounted for over 80.0 percent of total cropped area in the country.

7.7.3 Under food crops category, Uttar Pradesh had highest proportion of 22.1 percent of total area under food crops in the country followed by Rajasthan (12.7 percent), West Bengal (11.5 percent), Madhya Pradesh (10.0 percent), Karnataka (6.9 percent), Maharashtra (6.1 percent), Bihar (5.2 percent), Odisha (5.1 percent), Chhattisgarh (3.6 percent) and Tamil Nadu (3.0 percent). These ten States, thus, accounted for 86.0 percent of total area under food crops in the country. The sequence of States observed in case of 'cereals' indicated that Uttar Pradesh accounted for 24.5 percent followed by West Bengal (12.9 percent), Rajasthan (10.5 percent), Madhya Pradesh (8.9 percent), Bihar (6.4 percent), Odisha (5.7 percent), Karnataka (5.0 percent), Maharashtra (4.9 percent) and Chhattisgarh (4.1 percent). In pulses, Rajasthan had the largest proportion of area of 23.4 percent of total area under pulses in the country followed by Madhya Pradesh (19.1 percent), Karnataka (14.2 percent), Uttar Pradesh (11.1 percent), Maharashtra (10.1 percent), Odisha (4.5

percent), Andhra Pradesh (4.1 percent), Tamil Nadu (4.0 percent) and Chhattisgarh (3.1 percent), thus, accounted for about 94.0 percent of total area under pulses in the country.

7.7.4 As regards area under oilseeds in the category of non-food crops, Madhya Pradesh had the largest share of 29.3 percent of total area under the crop in the country followed by Rajasthan (23.8 percent), Maharashtra (16.9 percent), Karnataka (6.2 percent), West Bengal (5.5 percent), Uttar Pradesh (5.4 percent), Gujarat (3.9percent) and Andhra Pradesh (3.3 percent) forming together over 94.0 percent of total area under Oilseeds in the country. Under fibre crops, Maharashtra had little under 1/3rd of total area under this category in the country (30.2 percent) followed by West Bengal (18.6 percent), Telangana (17.0 percent), Gujarat (10.0percent), Karnataka (8.6 percent), Rajasthan (5.5 percent) and Andhra Pradesh (4.8 percent), thus, constituted about 95.0 percent of total area under fibre in the country. In case of area under fodder crops, Rajasthan had covered more than 4/5th of total area under this crop in the country (83.0 percent) followed by Uttar Pradesh & Maharashtra (4.0 percent each). Further, West Bengal had the highest share of 31.4 percent of total area under floriculture crops in the country followed by Tamil Nadu (19.8 percent), Karnataka (18.2 percent), Andhra Pradesh (7.7 percent), Maharashtra (6.4 percent), Telangana (6.3 percent) and Rajasthan (3.3 percent). The plantation crops, viz., tea, coffee etc. were more prevalent in States, like, Karnataka (24.8 percent), Tripura (22.6 percent), West Bengal (18.4 percent), Assam (15.8 percent), Kerala (12.3 percent), Tamil Nadu (3.9 percent) etc. The proportion of area under total non-food crops was the highest in Rajasthan (30.7 percent) followed by other States like Madhya Pradesh and Maharashtra (16.9 percent each), West Bengal (7.9 percent), Karnataka (6.1 percent), Gujarat (5.0 percent), Telangana (4.8 percent), Uttar Pradesh (3.8 percent) and Andhra Pradesh (3.4 percent).

7.8 Intensity of Cropping

7.8.1 The State-wise intensity of cropping of holdings of Scheduled Tribes during 2015-16 is given in Table 7.19.

Table 7.19: Statewise Intensity of Cropping of Scheduled Tribes, 2015-16

(Area in '00 ha.)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping (3/4)
1	2	3	4	5
1	Andhra Pradesh	3400	3289	1.0336 (1.0742)
2	Arunachal Pradesh	2999	2236	1.3411 (1.3016)
3	Assam	5094	4885	1.0428 (1.1183)
4	Bihar	1309	820	1.5960 (1.4250)
5	Chhattisgarh	22058	19033	1.1590 (1.1453)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping (3/4)	
1	2	3	4	5

25	Telangana	6437	5980	1.0763	(1.1023)
26	Tripura	1458	1168	1.2482	(1.0898)
27	Uttar Pradesh	1224	819	1.4955	(1.5285)
28	Uttarakhand	713	395	1.8045	(1.8589)
29	West Bengal	4843	3517	1.3773	(1.4708)
30	Andaman & Nicobar Islands	0	0	0.0000	(0.0000)
31	Chandigarh	0	0	0.0000	(0.0000)
32	Dadra & Nagar Haveli	179	161	1.1089	(1.0020)
33	Daman & Diu	2	2	1.0441	(1.0543)
34	Delhi	0	0	0.0000	(0.0000)
35	Lakshadweep	22	20	1.0755	(1.0005)
36	Puducherry	0	0	0.0000	(0.0000)
All India		181036	148178	1.2217	(1.2291)

Note: (1) Total may not tally due to rounding off. (2) Figures within brackets are for 2010-11.

7.8.2 Against all India average of 1.2217 in 2015-16, Uttarakhand recorded the highest intensity of cropping of 1.80 among all States/UTs followed by Bihar (1.60), Rajasthan (1.5041), Uttar Pradesh (1.4955), West Bengal (1.3773), Nagaland (1.3459), Arunachal Pradesh (1.3411), Madhya Pradesh (1.3155), Himachal Pradesh (1.2707), Maharashtra (1.2575), Kerala (1.2573), Jharkhand (1.2566), Tripura (1.2482) and Manipur (1.2367) which were higher than the national level of 1.2217. It also appears from the above statement that there was almost single cropping system prevailed among holdings of Scheduled Tribes during 2015-16 in Andhra Pradesh, Assam, Goa, Gujarat, Karnataka, Meghalaya, Mizoram, Odisha, Telangana, Daman & Diu and Lakshadweep.

7.9 State-wise Area under Principal Crops

7.9.1 The State-wise distribution, in percent, of area under principal crops of Scheduled Tribes holdings in 2015-16 may be seen in Table 7.20(a) and 7.20(b).

Table 7.20(a): Statewise Distribution of Percent of Area under Principal Crops (Food Crops) for Scheduled Tribes, 2015-16

Sl. No.	States/UTs	Cereals	Pulses	Food grains	Sugar Crops	Spices & Condiments	Fruits	Vegetables	Total Food crops

Note: (1) Total may not tally due to rounding off. (2) Neg - Negligible.

7.9.2 Considering all crops together, among all the States, Madhya Pradesh had the highest share, accounting for 21.2 percent of total cropped area in the country followed by Rajasthan (12.6 percent), Chhattisgarh (12.2 percent), Odisha (8.9 percent), Maharashtra (8.3 percent), Gujarat (5.2 percent), Jharkhand (4.6 percent), Karnataka (4.0 percent) and Telangana (3.6 percent), thus, accounted together for 80.0 percent of total cropped area in the country. Also, Madhya Pradesh had the maximum proportion of 19.3 percent of total area under food crops in the country followed by Chhattisgarh (14.8 percent), Odisha (10.6 percent), Rajasthan (10.5 percent), Maharashtra (6.7 percent), Jharkhand (5.6 percent), Gujarat (5.0 percent), Nagaland & Karnataka (3.6 percent each), Assam (3.2 percent) and West Bengal (3.0 percent) covering an area of 86.0 percent of total food crops in the country. The sequence of area under 'cereal crops' also showed that Madhya Pradesh had the highest share of 19.4 percent followed by Chhattisgarh (16.0 percent), Odisha (12.0 percent), Rajasthan (10.8 percent), Maharashtra (6.2 percent), Jharkhand (5.8 percent), Gujarat & Nagaland (4.2 percent each), West Bengal (3.4 percent), Assam (3.3 percent) and Karnataka (3.0 percent). Further, Madhya Pradesh had also the largest proportion of area, accounting for 30.0 percent of total area under pulses followed by Chhattisgarh (15.2 percent), Rajasthan (11.8 percent), Maharashtra (9.8 percent), Gujarat (8.1 percent), Odisha (6.6 percent), Karnataka (6.1 percent) and Telangana (3.2 percent) forming together above 90.0 percent of total area under pulses in the country.

7.9.3 In regard to oilseeds, Madhya Pradesh had the largest proportion of 37.9 percent of total area under the crop in the country followed by Rajasthan (29.6 percent), Maharashtra (9.9 percent), Karnataka (5.8 percent) and Gujarat (3.2 percent). These five States together covered above 86.0 percent of total area under Oilseeds in the country. Telangana had the highest proportion of 27.6 percent of total area under fibre in the country followed by Maharashtra (25.8 percent), Madhya Pradesh (19.1 percent), Gujarat (10.8percent) and Karnataka (7.1 percent). Rajasthan had the highest proportion of 37.3 percent of total area under fodder crops in the country followed by Maharashtra (31.6 percent), Gujarat (18.1 percent) and Madhya Pradesh (8.8 percent). In case of floriculture crops, Karnataka had the highest share of about 25.3 percent of total area under the crop in the country followed by Tripura (19.2 percent), Nagaland (18.0 percent), Tamil Nadu (12.4 percent), Telangana (7.0 percent) and Andhra Pradesh (3.6 percent). The high concentration of plantation crops was reported in the States of Tripura (40.6 percent) followed by Kerala (15.4 percent), Assam (9.5 percent) etc. The proportion of area under total non-food crops was at the maximum of 28.8 percent in Madhya Pradesh while Rajasthan was at the next (21.4 percent) followed by Maharashtra (14.9 percent), Telangana (8.8 percent), Gujarat (6.1 percent) and Karnataka (5.9 percent).
